1

When on the eMAR homepage, select **Record Information** from the 5 options.

2

Next, select the **Medication Database.**

Upload Pictures
Common Options
Creams
Medical Visit
Medication Database
Homely Remedies
Medication Disposal

3

This will display all the medication currently on your system. To add a new one, press **Add Medication**.

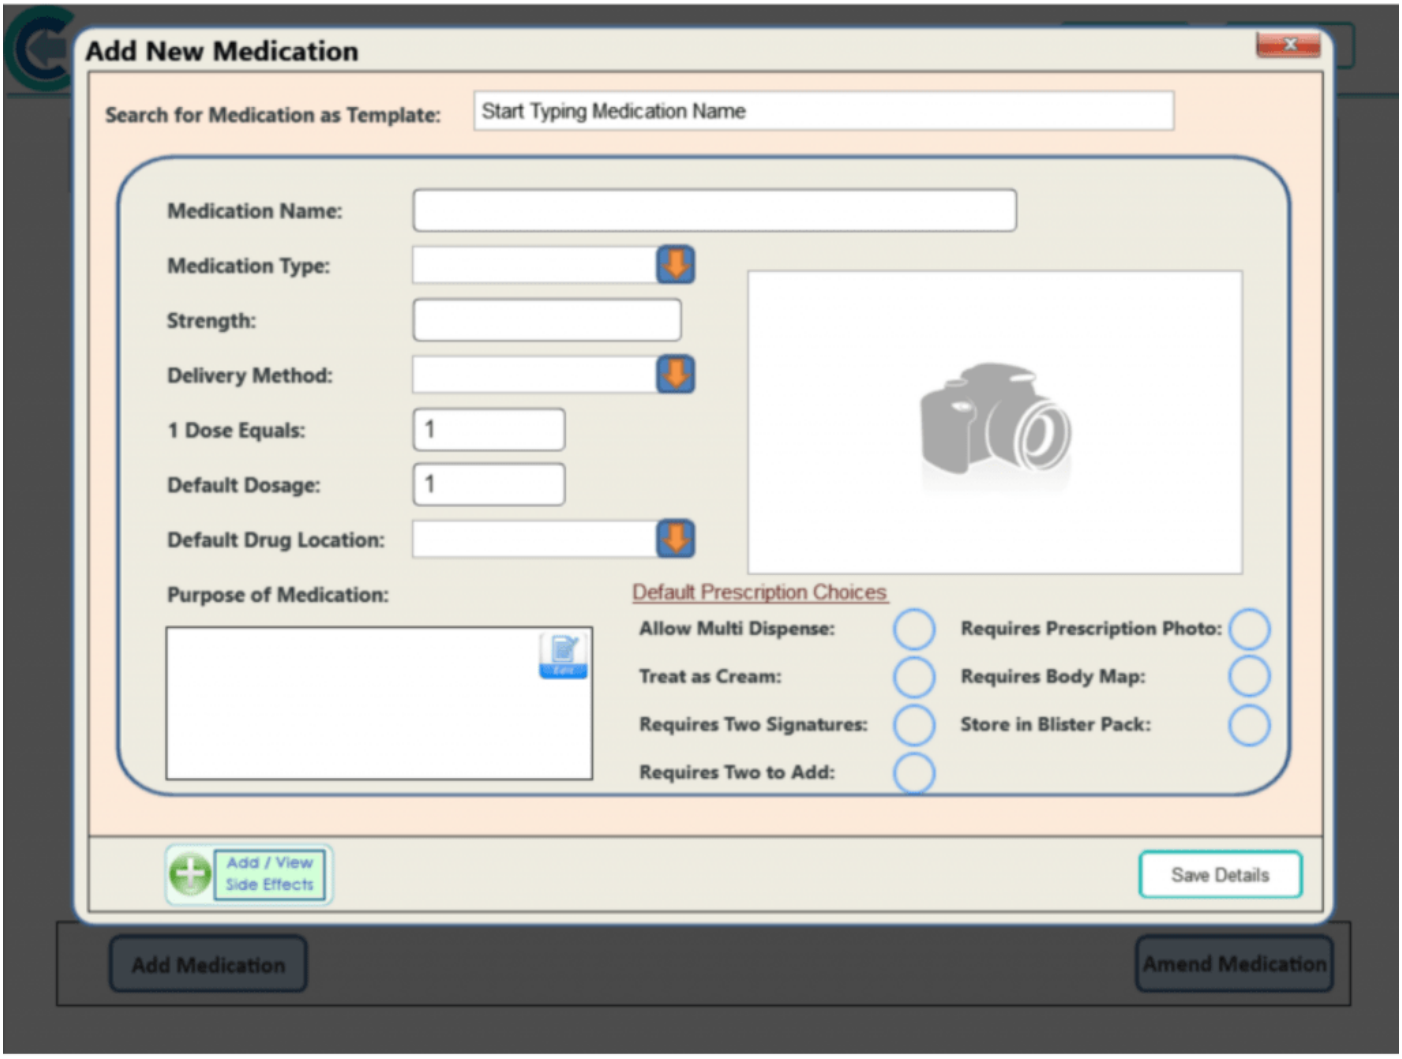
4

A blank form will be displayed. You can use an existing medication as a template by searching for the medication in the search bar at the top of the window.

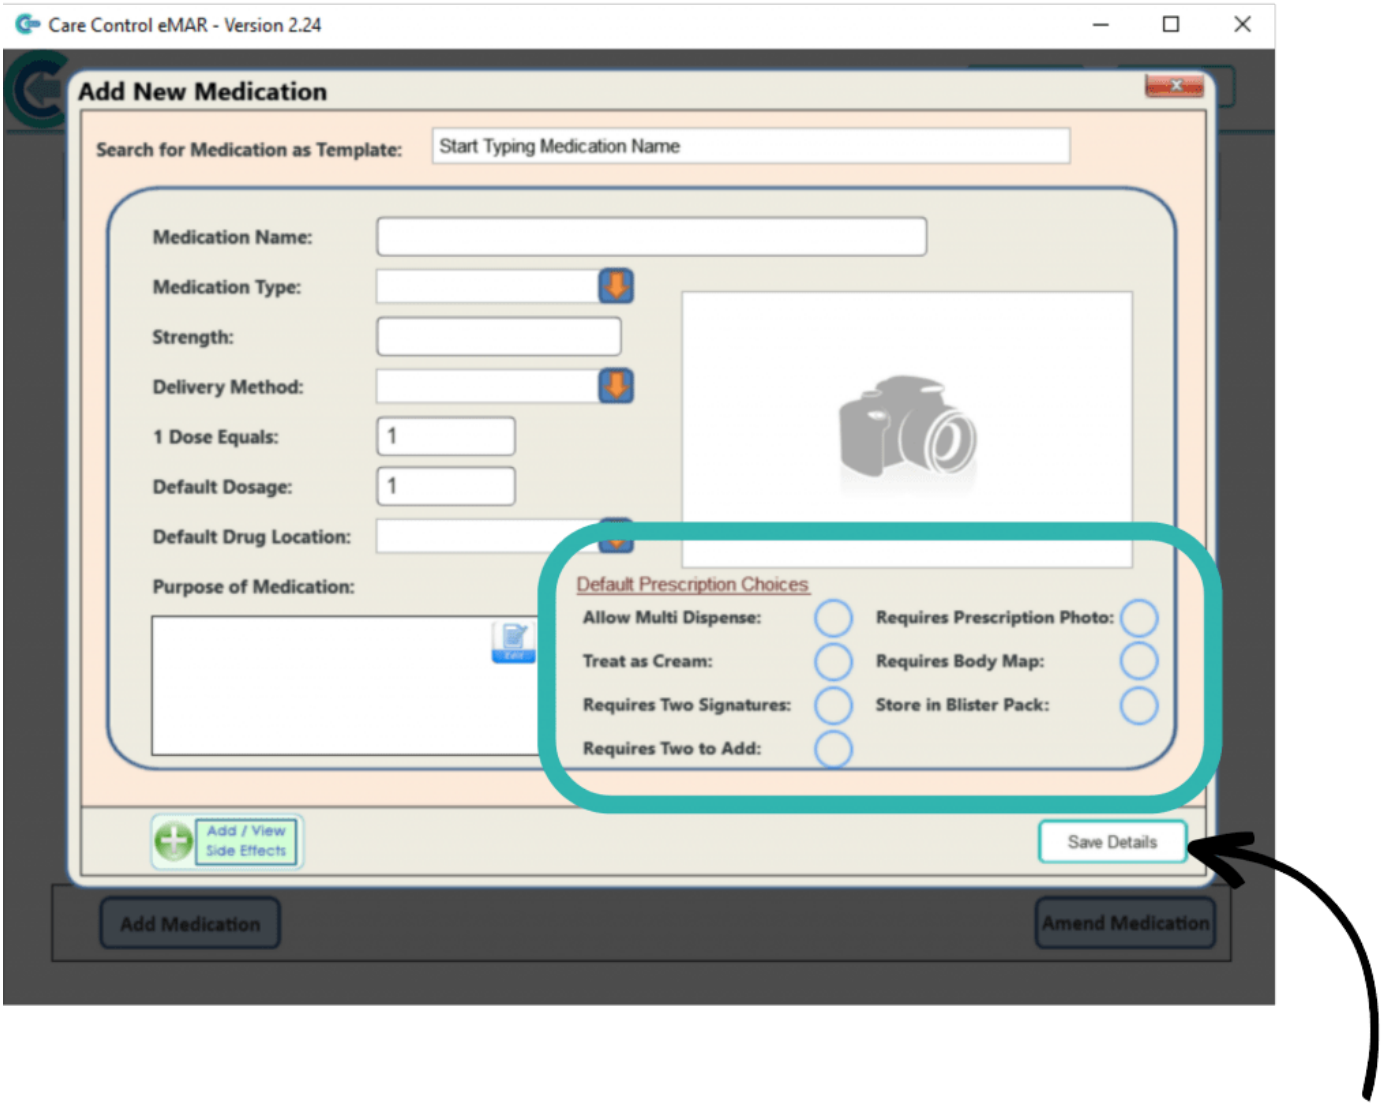
You can now proceed to fill out the information required:

- **Medication Name**
- **Medication Type**
- **Strength** – for example 20mg
- **Delivery Method**
- **Dosage** – for example, 1 dose equals 1 tablet
- **Default Dosage**
- **Default Drug Location** – choose from the drop-down list or select Your Entry to type in a new one
- **Purpose** – press the Edit button to enter the purpose of the medication

You can also add a photo of the medication by tapping on the camera icon.



Add New Medication
Search for Medication as Template:
Start Typing Medication Name
Medication Name:
Medication Type:
Strength:
Delivery Method:
1 Dose Equals:
1
Default Dosage:
1
Default Drug Location:
Purpose of Medication:
Default Prescription Choices
Allow Multi Dispense:
Requires Prescription Photo:
Treat as Cream:
Requires Body Map:
Requires Two Signatures:
Store in Blister Pack:
Requires Two to Add:
Add / View Side Effects
Save Details
Add Medication
Amend Medication



5

The next set of options relate to when the medication is used as a prescription:

- **Allow Multi Dispense** –select if this medication can be given with others
- **Treat as Cream** – select if the medication is a cream
- **Requires Two Signatures** – select if two staff members are needed to administer
- **Requires Two to Add** – select if two staff members are needed to create as a prescription

- **Requires Prescription Photo** – select to require a photo when used in a prescription
- **Requires Body Map** – select to require body map recording when administering
- **Store in Blister Pack** – select if this medication is stored in a Blister Pack

You can add side effects by pressing **Add Side Effects** at the bottom of the window.

Finally, select **Save Details** to finish adding the medication.
