Adding & Removing Monitoring via CC Windows

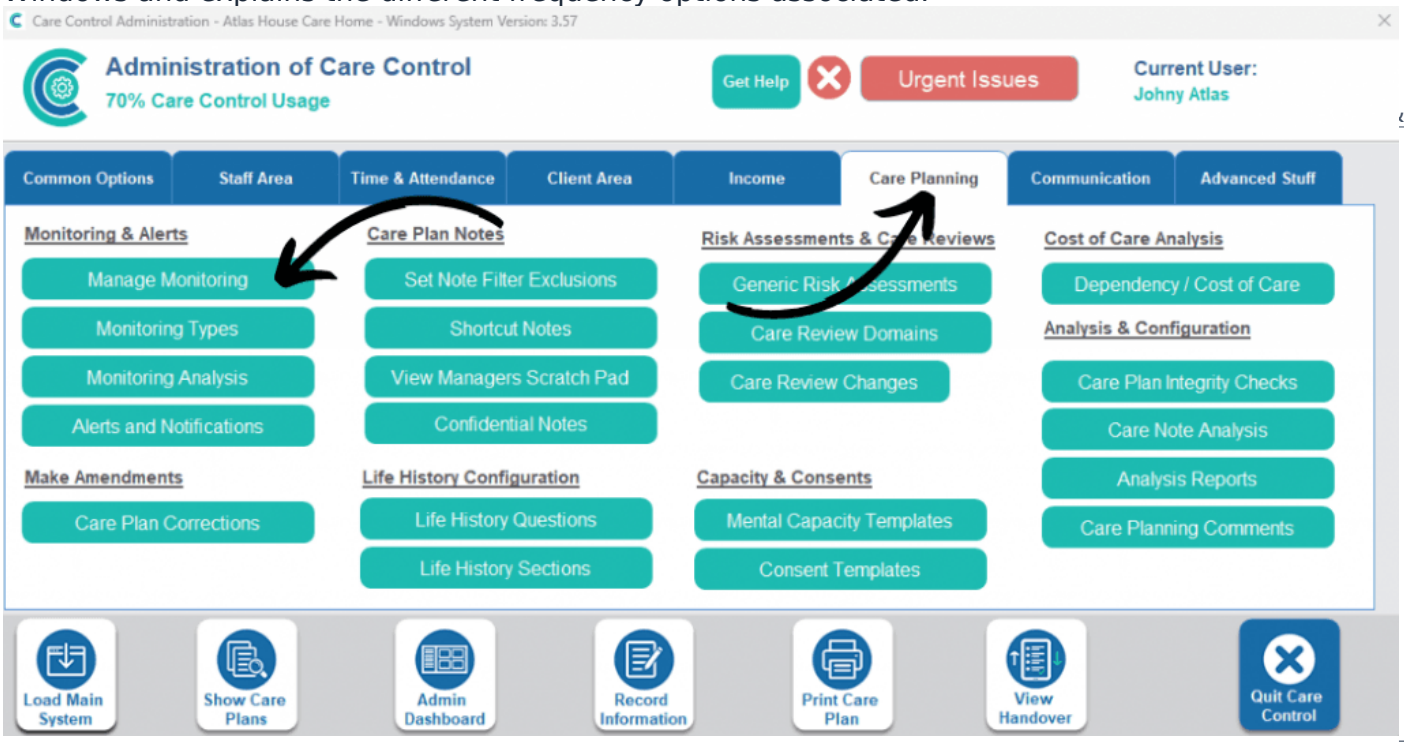
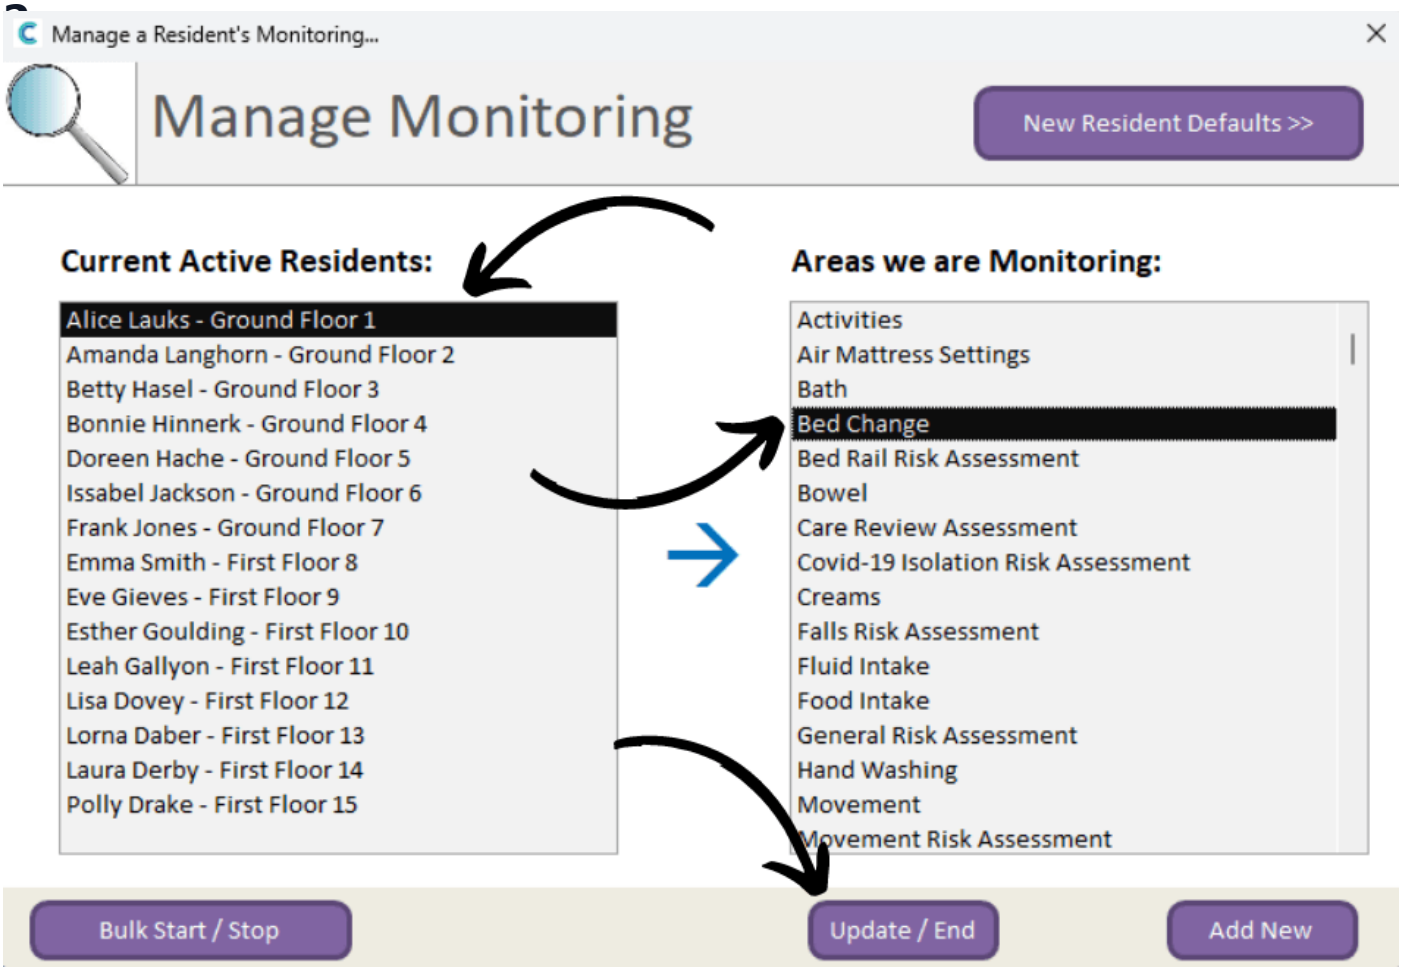
This guide will cover how to start and stop monitoring for your service users on Care Control Windows and explains the different frequency options associated.

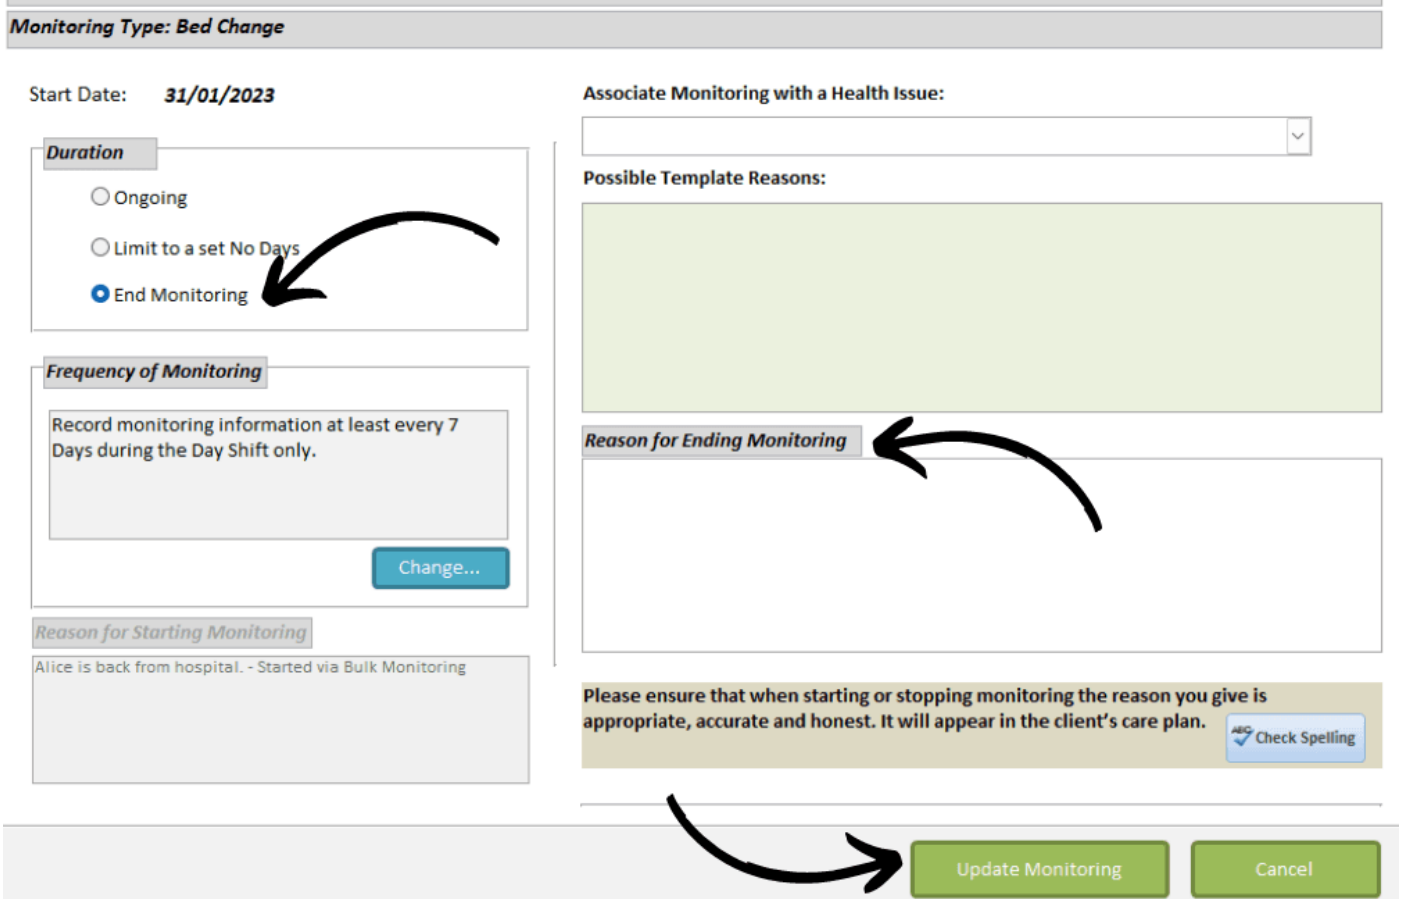


1

In the **Administration of Care Control Windows**, navigate to the **Manage Monitoring** tool, which can be found under the **Care Planning** tab.

The first half of this guide will cover how to **end** existing monitoring areas for a service user.





3

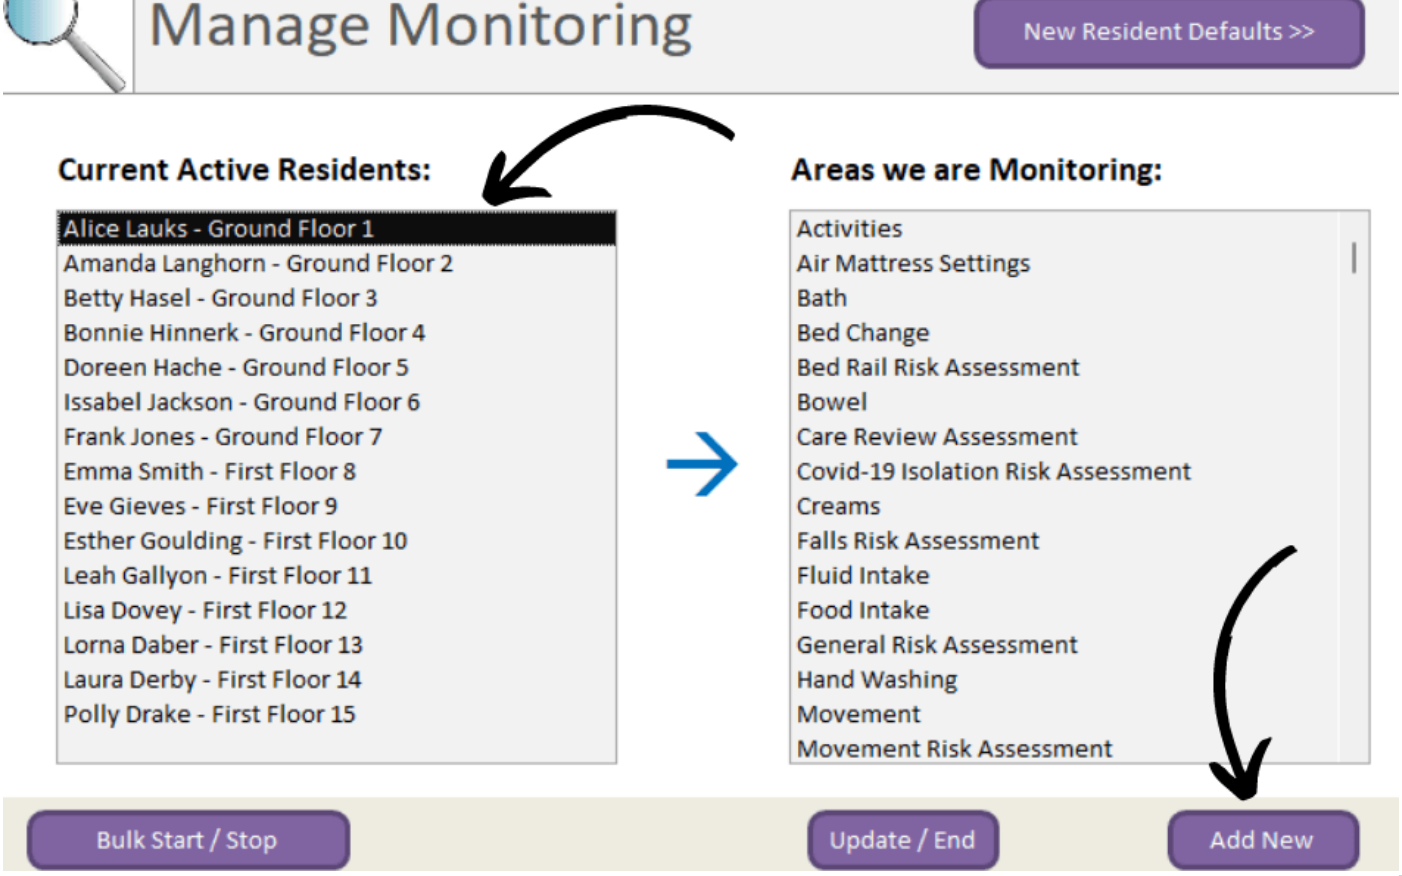
Another new window will open. Here, select **End Monitoring** from the 'duration' tick boxes. Then, enter a **reason** for the monitoring being ended and finally, press **Update Monitoring**.

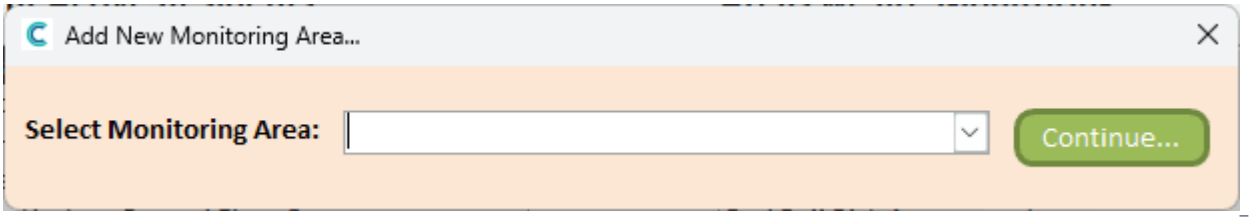
The monitoring area will be removed from the service users active list.

4

To add a new monitoring area for a service user, first navigate back to the **Manage Monitoring** screen, as shown at the start of this guide.

Then, select a **service user** and press **Add New**.





5

A new window will open. Here, select the monitoring area you wish to assign from the drop-down list. Then, press **Continue**.

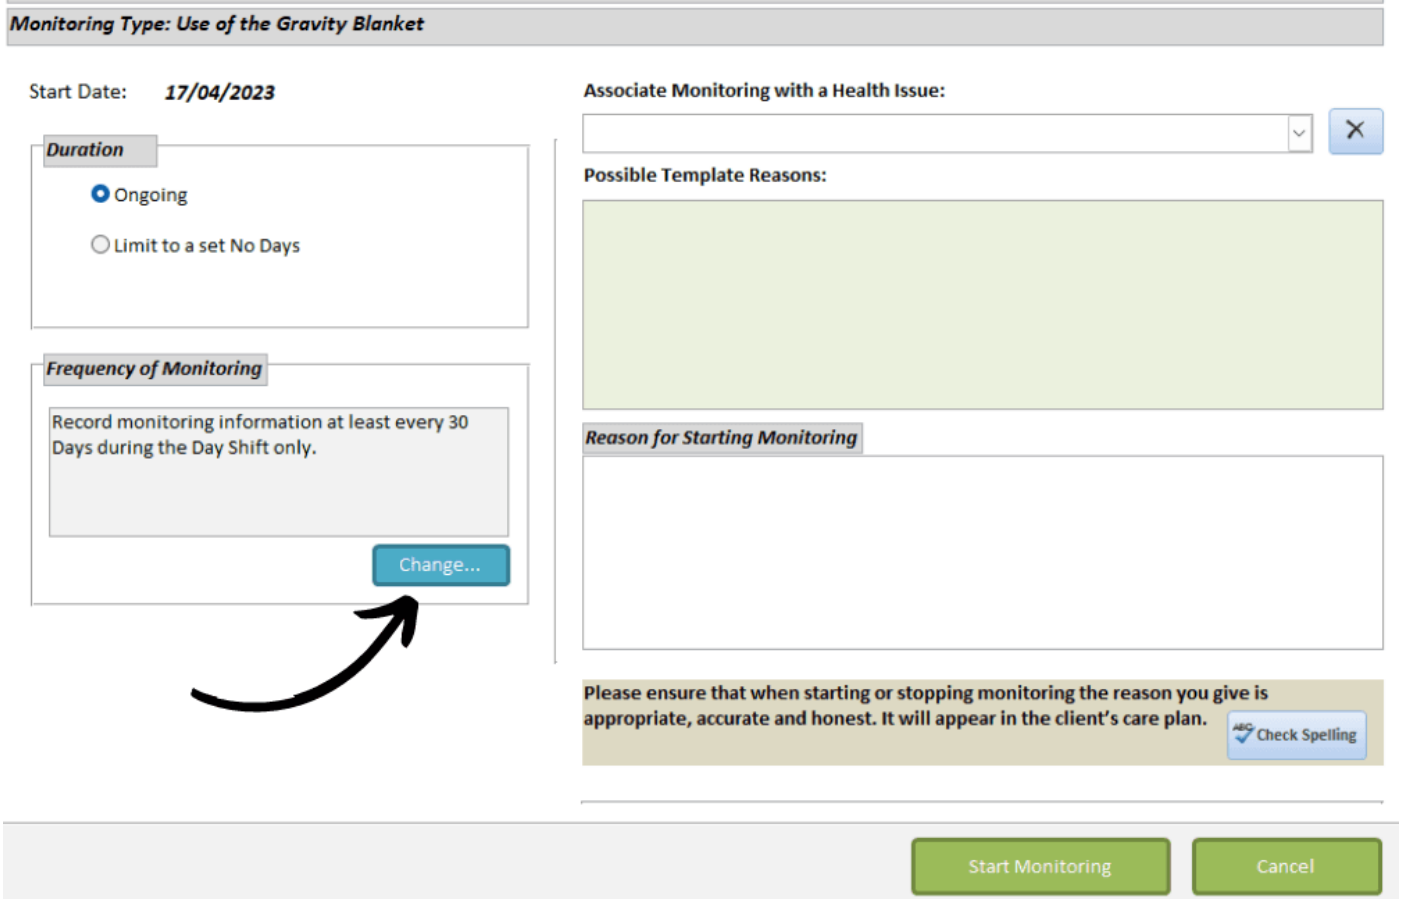
6

Another new window will open. Here, you can set the frequency parameters for the monitoring area:

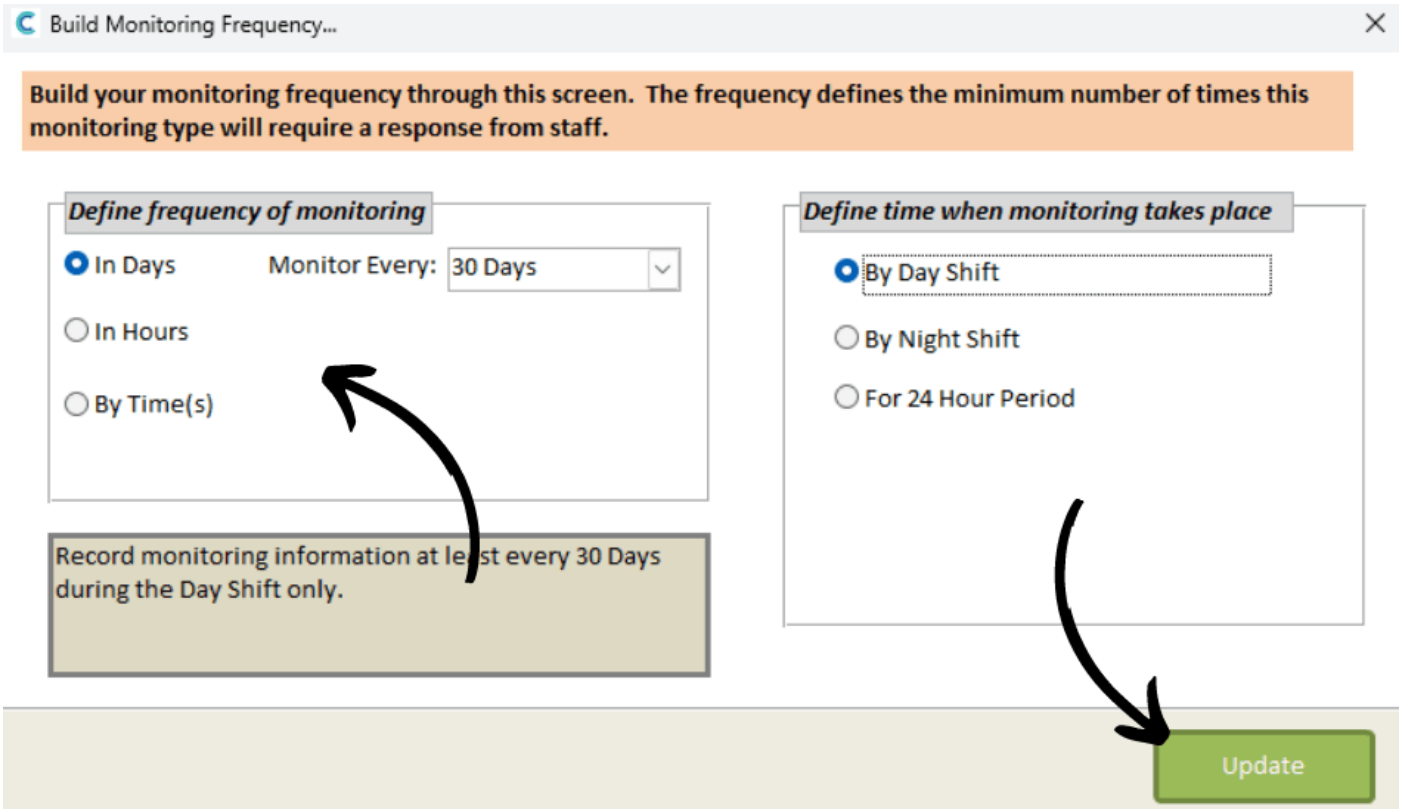
Duration:

- Ongoing – continuous monitoring
- Limit to set no. of days – choose a date for the monitoring to automatically end

Select a **Duration**, then, press **Change**.



Monitoring Type: Use of the Gravity Blanket
Start Date: 17/04/2023
Duration
Ongoing
Limit to a set No Days
Frequency of Monitoring
Record monitoring information at least every 30 Days during the Day Shift only.
Change...
Associate Monitoring with a Health Issue:
Possible Template Reasons:
Reason for Starting Monitoring
Please ensure that when starting or stopping monitoring the reason you give is appropriate, accurate and honest. It will appear in the client's care plan.
Check Spelling
Start Monitoring
Cancel



Build Monitoring Frequency...
Build your monitoring frequency through this screen. The frequency defines the minimum number of times this monitoring type will require a response from staff.
Define frequency of monitoring
In Days
Monitor Every: 30 Days
In Hours
By Time(s)
Record monitoring information at least every 30 Days during the Day Shift only.
Define time when monitoring takes place
By Day Shift
By Night Shift
For 24 Hour Period
Update

7

Here, select a frequency:

- In Days – occurs every X days
- In Hours – occurs every X hours
- By Times – occurs at custom times of the day
- By Day Shift – occurs within the day shift hours
- By Night Shift – occurs within the night shift hours
- For 24-hour period – occurs throughout the day, both day & night

Press **Update** after selecting your frequency parameters.

8

To complete the monitoring addition, enter a **reason** for starting the monitoring and finally, press **Start Monitoring**.
