Adding Cream Charts to Care Control

This guide will cover how to add cream medications to a service users care plan to allow them to be recorded alongside other medications. This process is completed within the administration side of Care Control Windows.

1

In the **Administration of Care Control Windows**, select **Show Care Plans** from the options along the bottom of the window.

2

Next, select the **Service User** from the left hand list, then, press **Medication Details** from the right hand options.

5

A new row should appear. Here you can enter the details of the cream.

First, select a **start date** for the cream to begin.

An **end date** can be added if required but leave this blank if not.

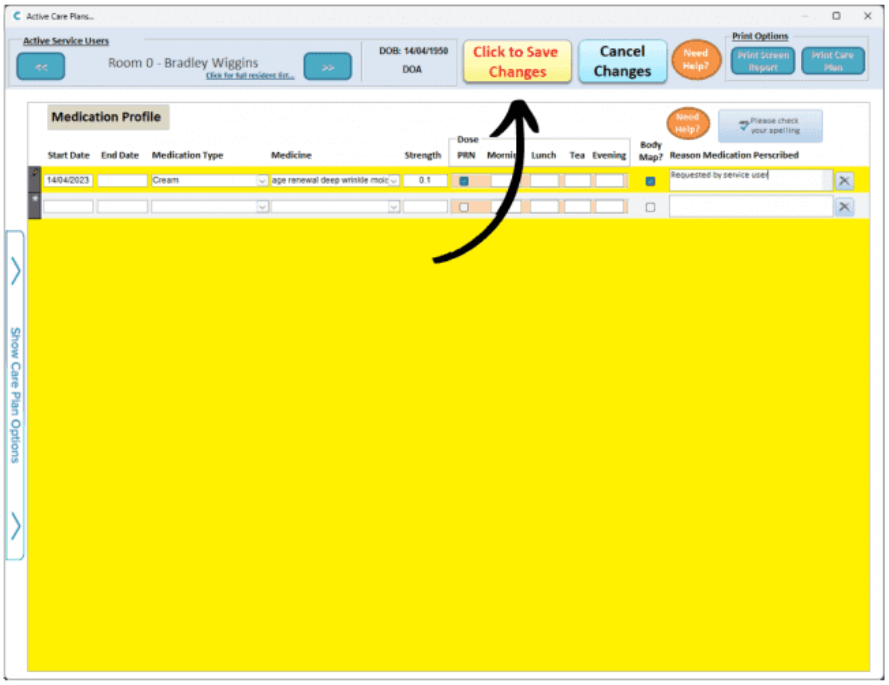

Next, select **Cream** from the **Medication Type** drop down menu, then, select the specific cream from the **Medicine** drop down menu.

Enter the **Strength** of the cream, as well as whether the cream is **PRN** (tick box) or the times of day for administration.

Finally, tick the **Body Map** box to create an associated body map for where the cream should be applied, then, enter a reason for the cream.

6

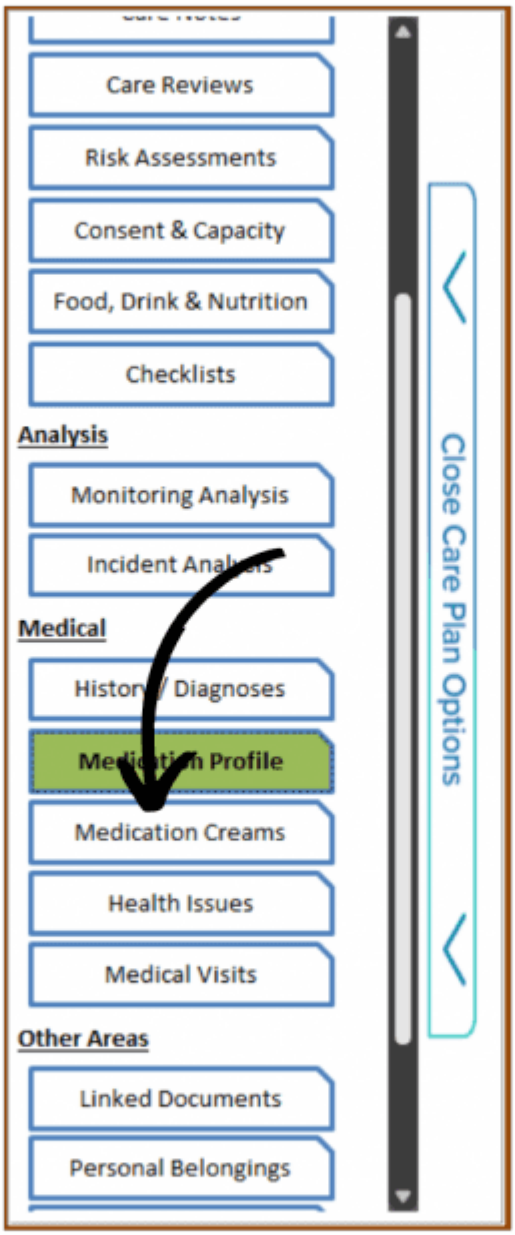

After completing the row, press **‘Click to Save Changes’** at the top of the window.

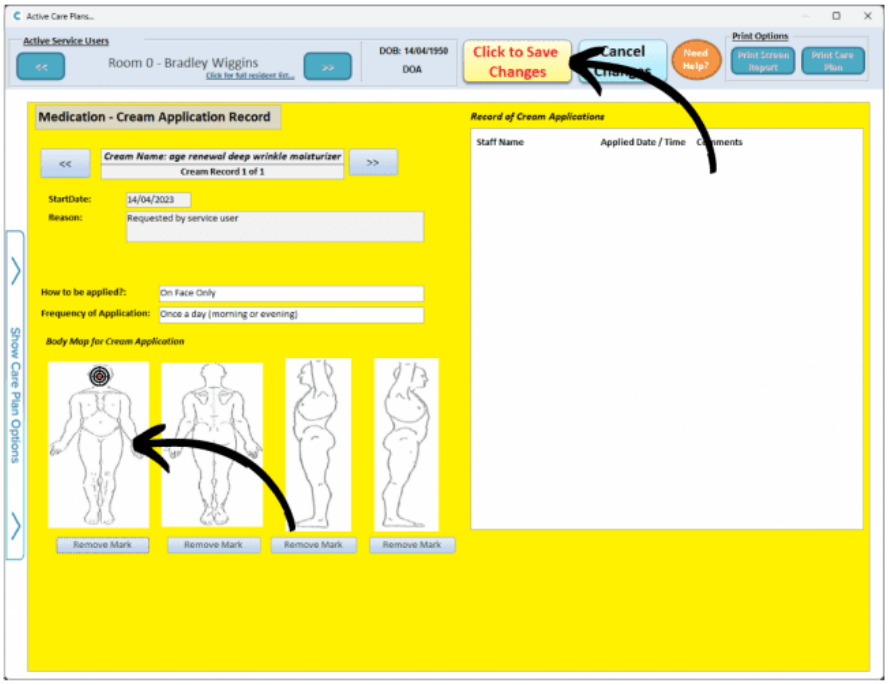

7

To create the associated body map, open the side menu labelled ‘**Show Care Plan Options**’.

From this list, find and select **Medication Creams**.

8

In the same way as earlier, press **‘Click to Edit Care Plan’**, then **‘Click to Change Record’** at the top of the window.

Then, find the cream you wish to edit the body map for using the blue arrows.

Here you can enter some information for **application** and **frequency** in the dedicated text boxes, as well as clicking on the body maps to add markers for cream application.

After making any changes, press **‘Click to Save Changes’** at the top of the window.
