Entering and Administering PRN Medication

This guide will cover how to set up medication prescriptions to be PRN (as required), as well as how to administer them to service users. For further information about creating prescriptions and administering medication, please refer to the dedicated guides.

3

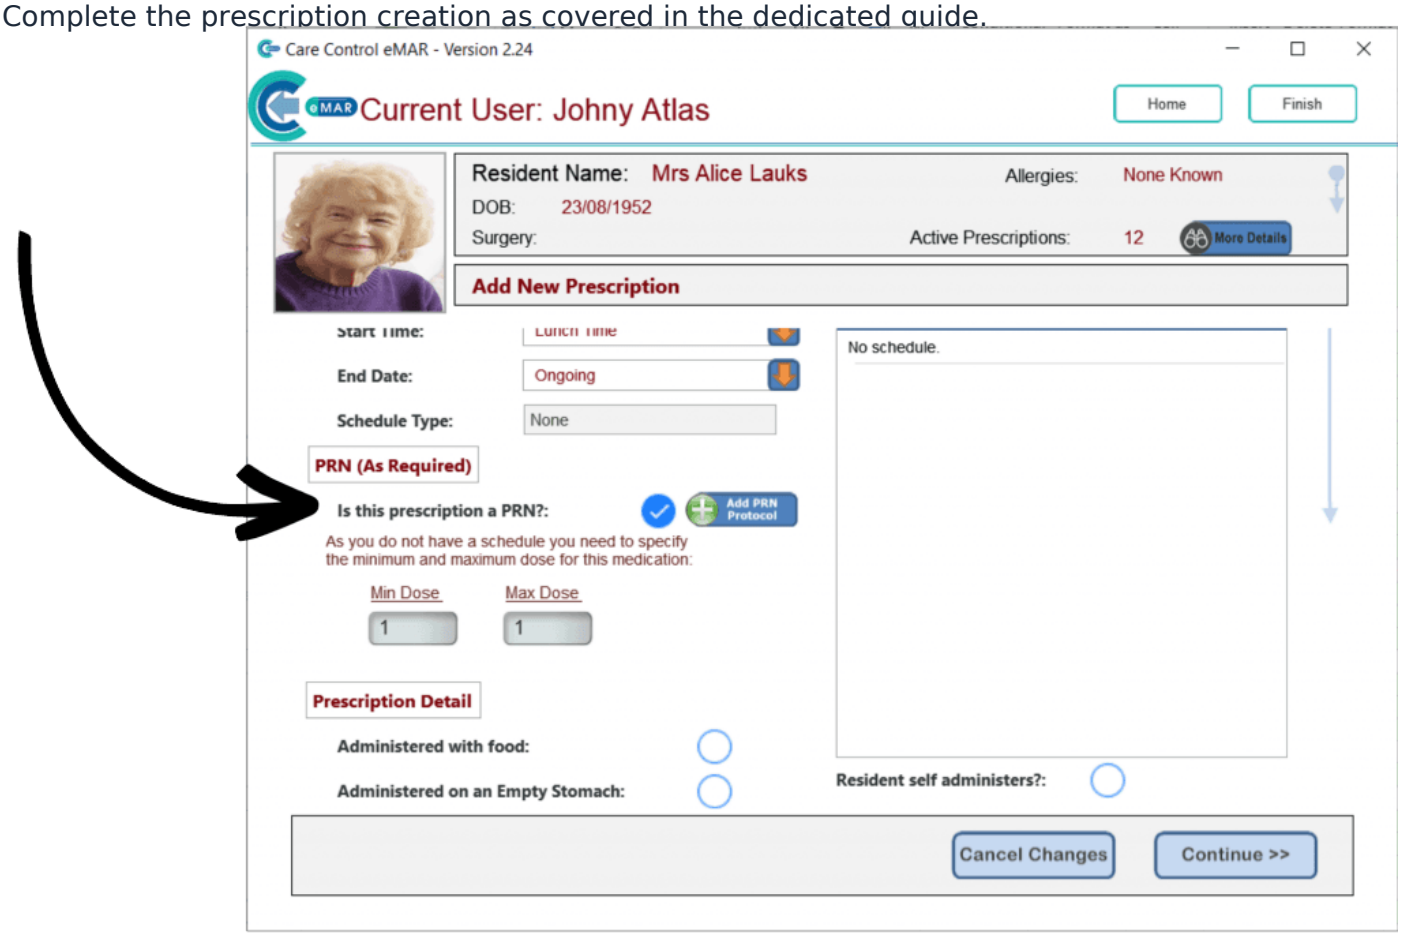
A list of active prescriptions will be displayed for the selected service user. Press **Add New Prescription** from the toolbar at the bottom of the screen.

4

A blank prescription form will open. Here you can complete the medication details as well as select other prescription options.

Under the PRN (As Required) section, **ensure that the checkbox is ticked**, and minimum/maximum dosages have been entered.

Complete the prescription creation as covered in the dedicated guide.



5

We are now ready to administer the PRN prescription. After signing in to administer, select **Administer Medication** from the 5 options.

6

Select the service user from the list and press **Continue**.

Note: You can also choose to administer to staff from this screen.
