## Glossary of Terms for CC Screens

This guide will introduce some key words and terminology used on Care Control Screens and help you better understand the set-up guides associated with the Screens app.

**Android Box –** a small black box which connects to a TV to display Care Control Screens.

**Care Control Screens Controller** – the application which controls Care Control Screens.

**Instance** – the slides of the information shown on your TV.  *Templates* with *Options*, *Display Time* , *Transitions* and a *Schedule* can be used.

**Group** – a collection of *Instances* in a specific order. These can be assigned to a *Screen*.

**Screen** – a ScreensHD Android TV device. In other words, your TV and Android Box.

**Options** – these are options within a *Template* which offer reconfigurability for that *Template*.

**Order** – this is the order in which *Instances* will display within a specific *Group*.

**Schedule** – dictates the times of the day that the screen will be shown/not shown.

**Template** – a pre-made screen *Template* you can configure with *Options*.

**Transition** – the animation from one *Instance* to another.
