Bulk Start/Stop Monitoring

Monitoring Windows · https://cclearninghub.co.uk/docs/bulk-start-stop-monitoring/

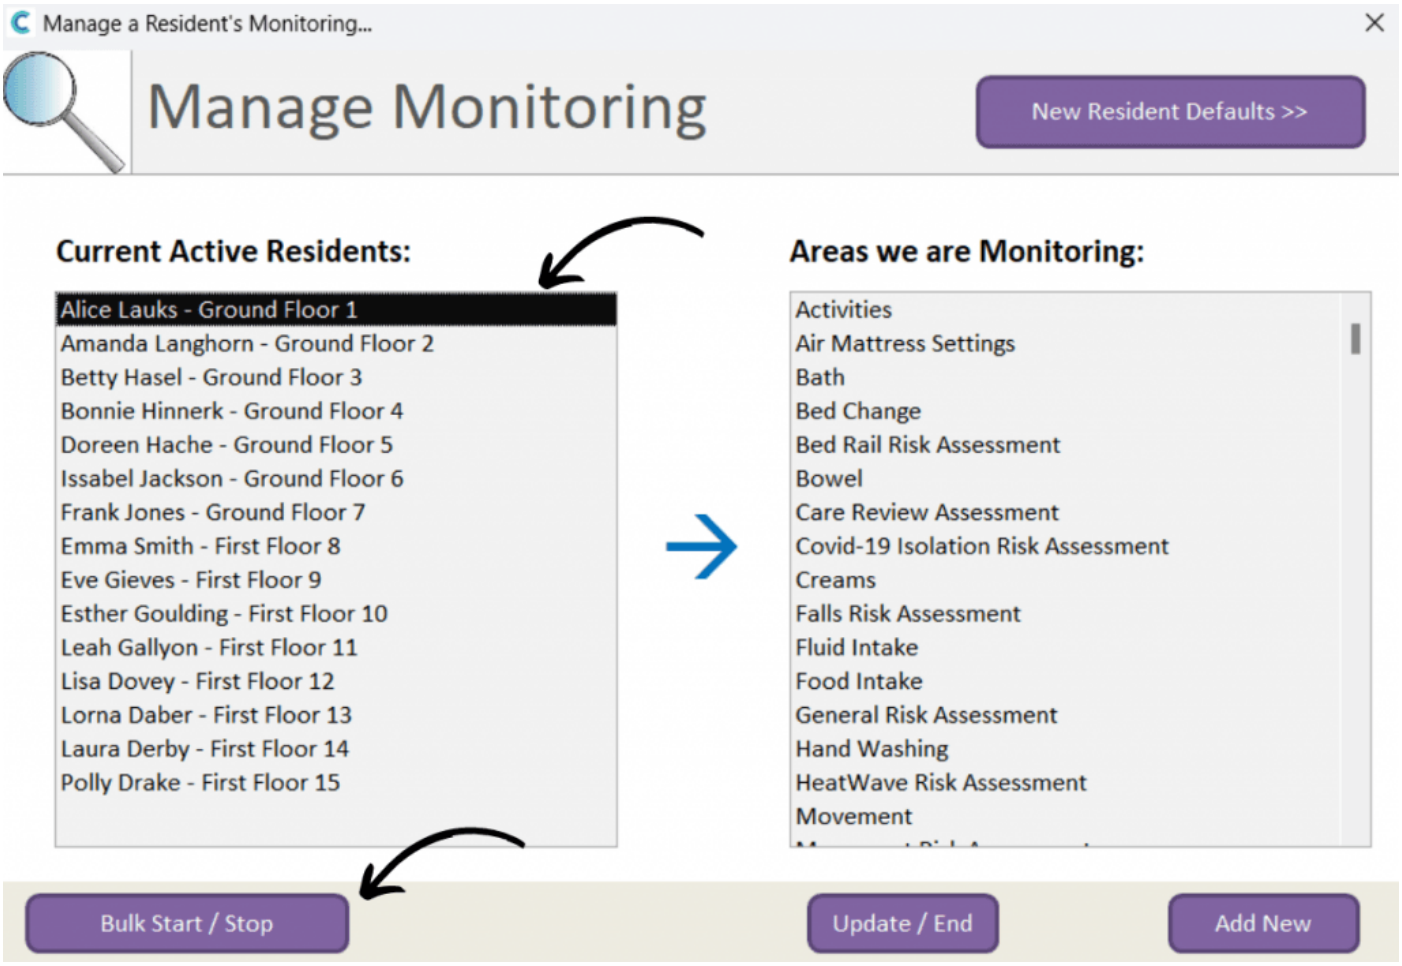

Bulk Starting and Stopping Monitoring

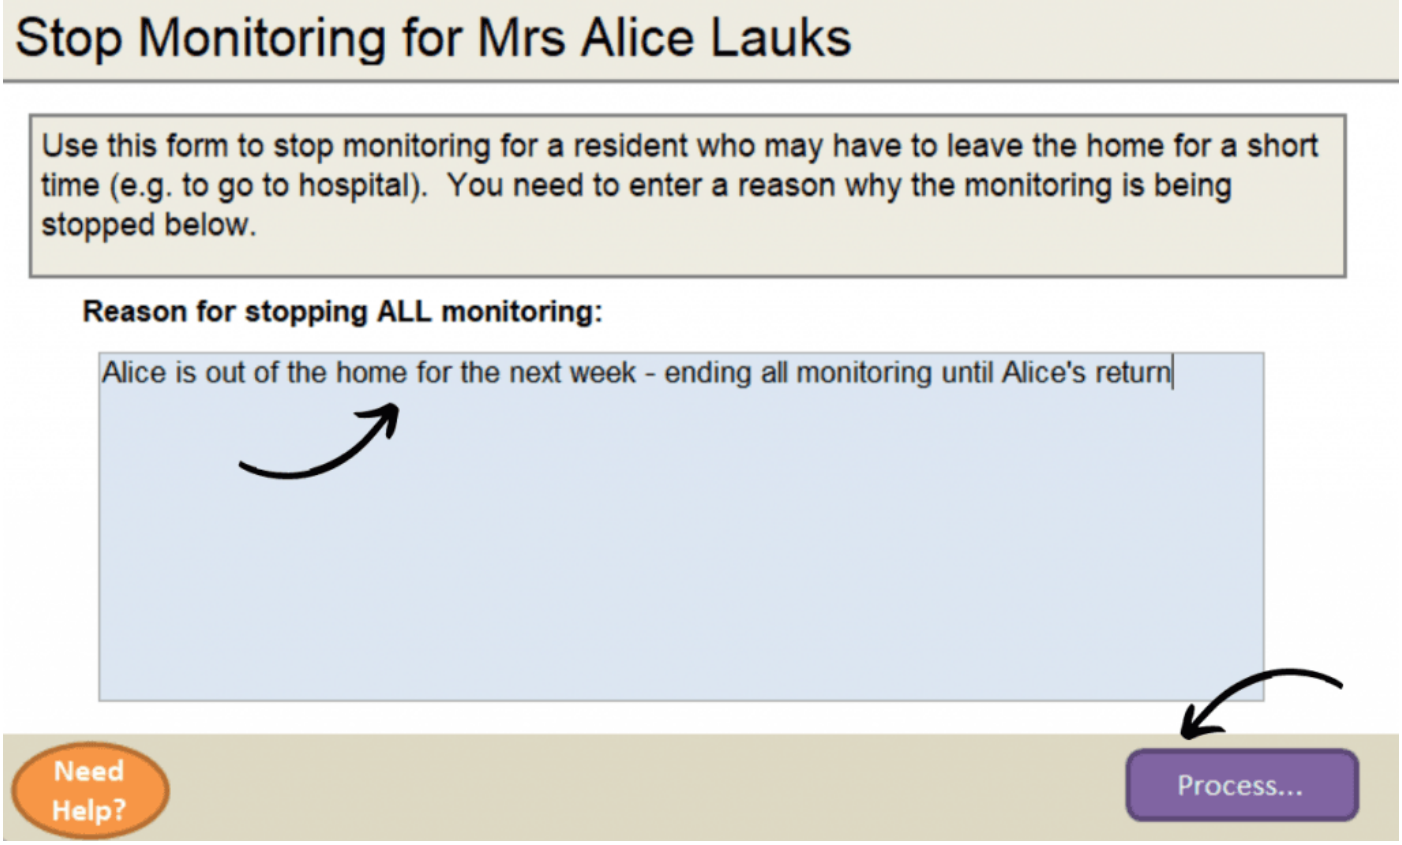

This guide will cover how to bulk stop and start service user monitoring. This can be useful if a

1

In the Administration of Care Control Windows, open the **Manage Monitoring** tool, which can be found under the **Common Options** and **Care Planning** tabs.

3

A new window will open, here, enter the reason for the change and press **Process**.

4

When the service user returns from their absence and requires monitoring to start again, follow the same steps as above and this time, enter the reason for return.

Press **Process** to complete the process.

Restart Monitoring for Mrs Alice Lauks

Use this form to restart recently stopped monitoring for a resident who may have left the home for a short time (e.g. to go to hospital), but has now returned. The system will restart the last set of monitoring stopped.

Reason for restarting monitoring:

Alice has returned to the home after her time away - restarting all monitoring
