Guided Access and Kiosk Mode

This guide will cover how to set up Guided Access & Kiosk mode for an iPad device using Care Control Mobile’s V-Book feature. Setting this up allows the device to be locked to the V-Book, preventing misuse.

Select version:

iPadOS 16

Table of Contents

Use Guided Access on iPad

Guided Access helps you stay focused on a task by temporarily restricting iPad to a single app, and allowing you to control which app features are available. You can do any of the following:

- Disable areas of the screen that aren't relevant to a task, or areas where an accidental gesture might cause a distraction
- Disable the iPad hardware buttons
- Limit how long someone can use the app

Set up Guided Access

1. Go to Settings > Accessibility > Guided Access, then turn on Guided Access.
2. Adjust any of the following:

   - *Passcode Settings:* Tap Set Guided Access Passcode, then enter a passcode.

     You can also turn on Face ID or Touch ID as a way to end a Guided Access session.

   - *Time Limits:* Play a sound or speak the time remaining before a Guided Access session ends.
   - *Accessibility Shortcut:* Turn the shortcut on or off during Guided Access sessions.
   - *Display Auto-Lock:* Set how long it takes iPad to automatically lock during a Guided Access session.
