Changing Sites

Administration Windows · https://cclearninghub.co.uk/docs/changing-sites/

Changing Sites

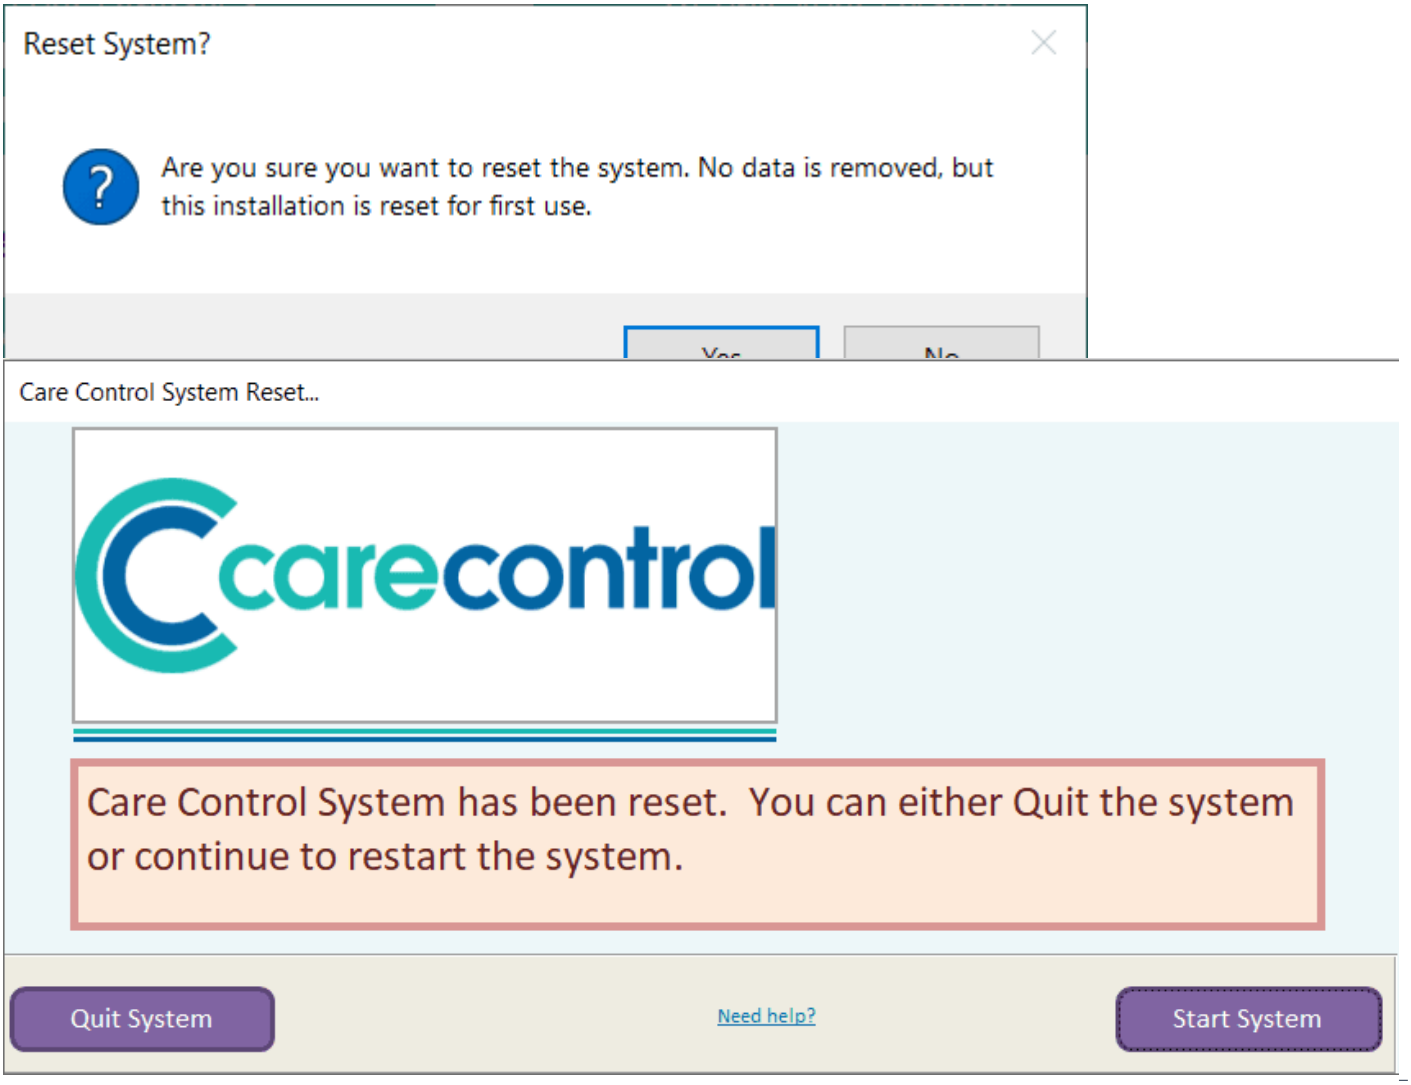

This guide will cover how to change sites on Care Control Windows. This method will reset your system so that you can re-register using a different site or business code.

1

In the **Administration of Care Control Windows**, navigate to the **Change Sites / Reset System** button, which can be found under the **Advanced Stuff** tab.

2

3

Your Care Control will reset. Press **Start System** to begin registration.

4

Register your system...
Welcome to Care Control!
carecontrol
Before we care start to configure your system we first need some information. Please enter below a Device Name (this has to be a unique name for this computer within your Care Control) and a Site Code.
Device Name:
This can be any name that will help identify this computer. Example could be Office1 or Nurse1
Site Code:
Tip: You can access other sites in your organisation, but you first must register to an individual site.
Every organisation should have at least one site code.
