# eMAR Reports

Care Control eMAR · https://cclearninghub.co.uk/docs/emar-reports/

## eMAR Reports

This guide will cover how to access medication related reports on both CC eMAR and CC Windows. Reports available on the eMAR application are handy when quick analysis is needed, but for more in-depth information and results, we recommend using CC Windows.

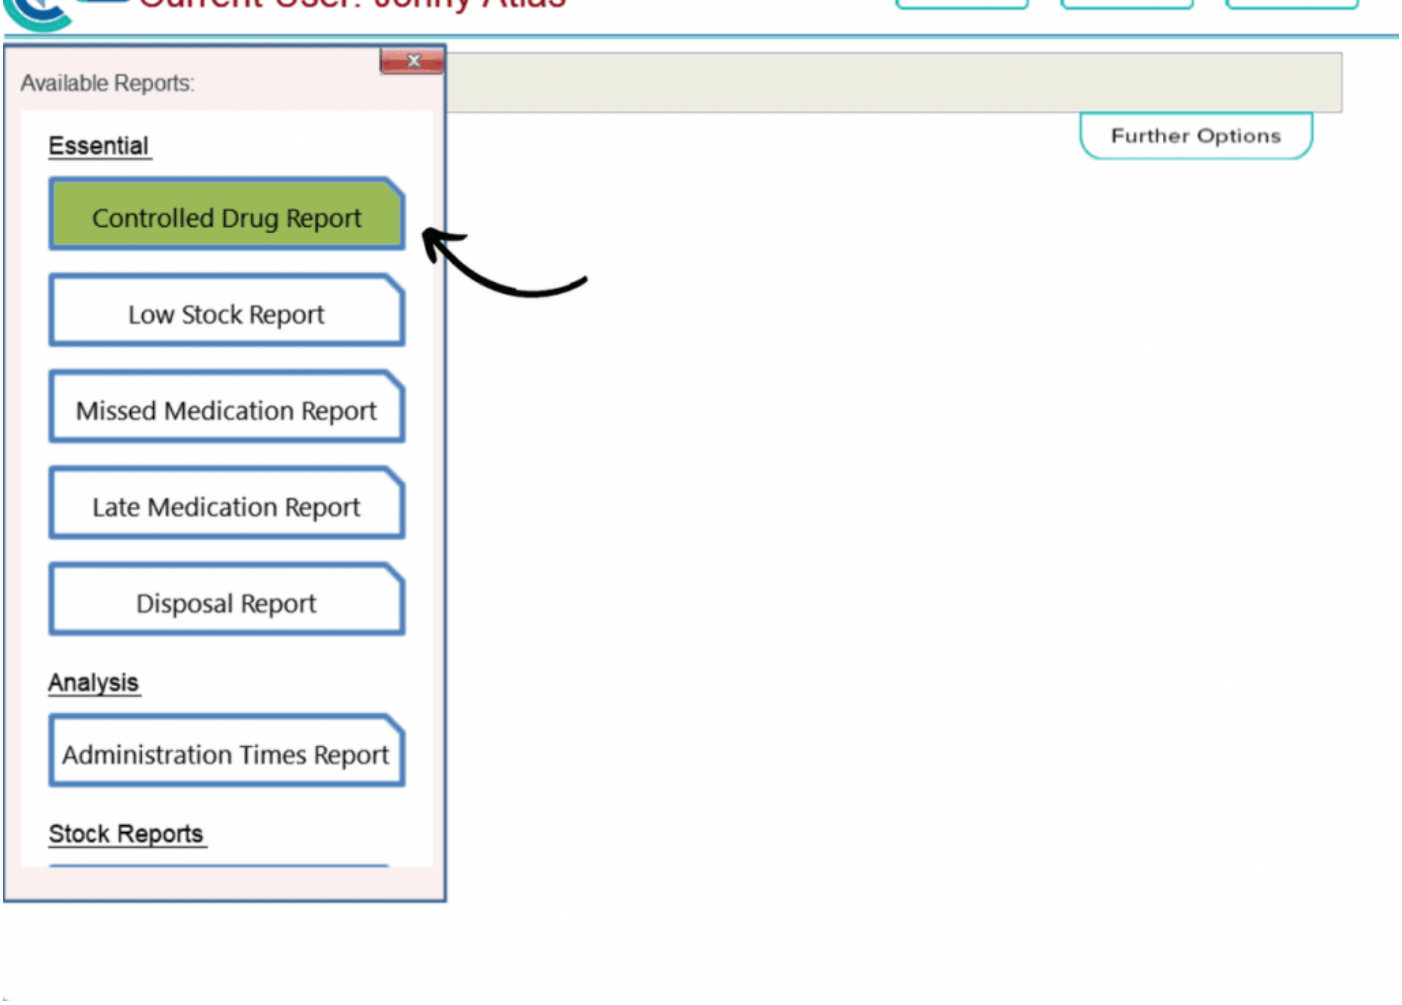

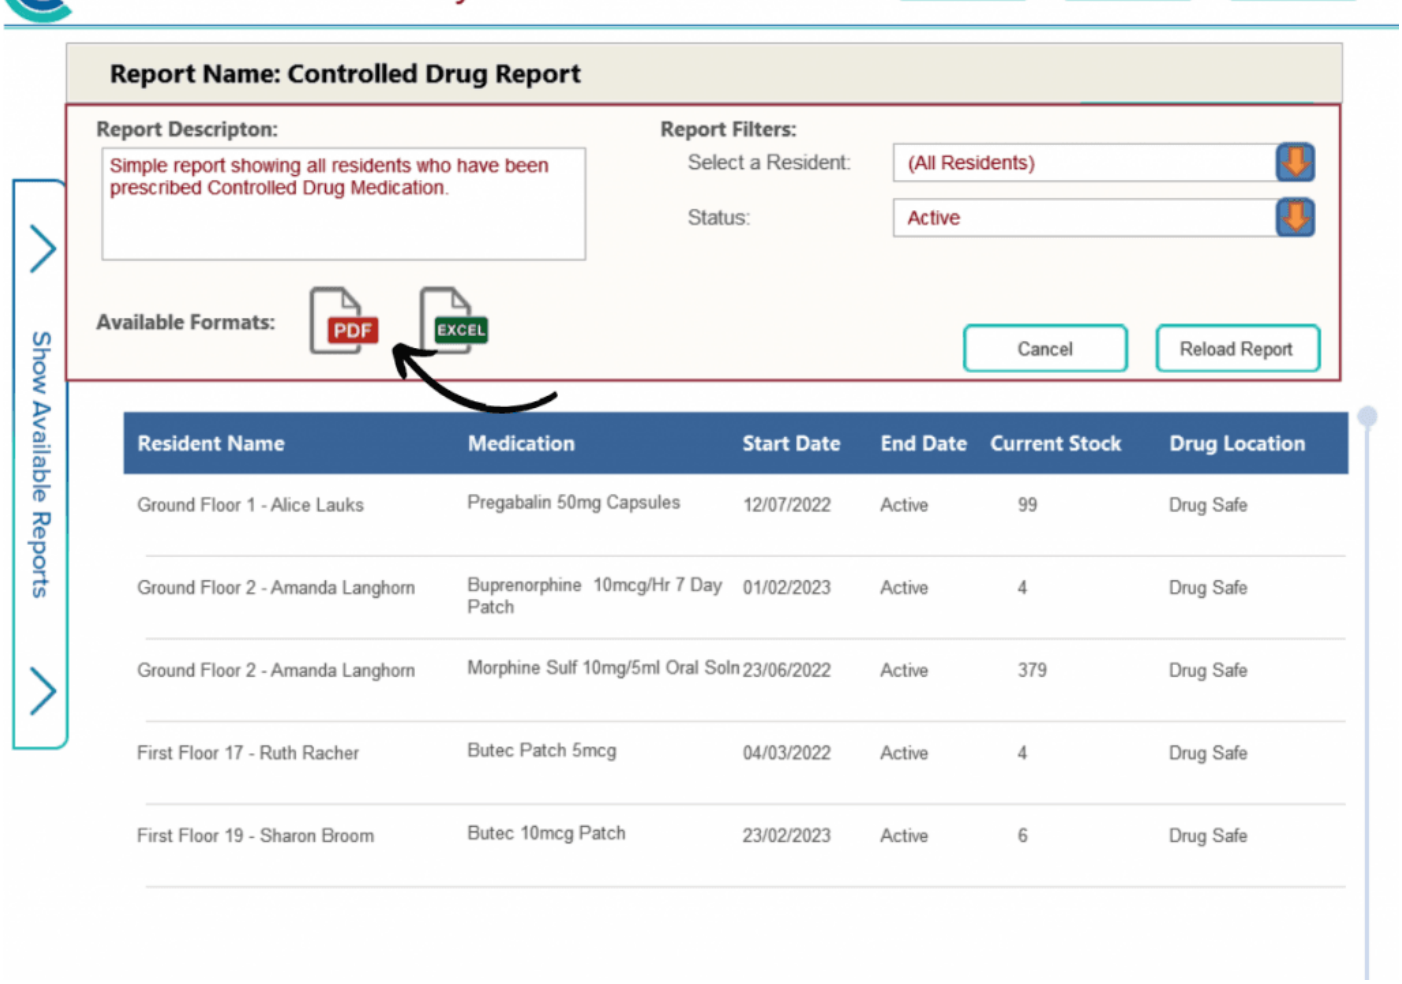

## 1

After signing into eMAR, select **Reports & Audits**.

## 2

Next, select a report from the options on the left-hand side.

Current User: Johny Atlas
Available Reports:
Essential
Controlled Drug Report
Low Stock Report
Missed Medication Report
Late Medication Report
Disposal Report
Analysis
Administration Times Report
Stock Reports
Further Options

## 3

Press **Further Options** to view a report description and report filters. From here you can also export the report to a PDF or Excel file – in both cases, the results will open the devices browser.

## 4

In the Administration of Care Control Windows, open the **Analysis Reports** tool, which can be found under the **Common Options** tab.

## 5

A new window will open. Here, select eMAR Reports from the category drop-down list. You can now view and select a report from the report name drop-down list. Press **Run Report**.
