Medication Creams

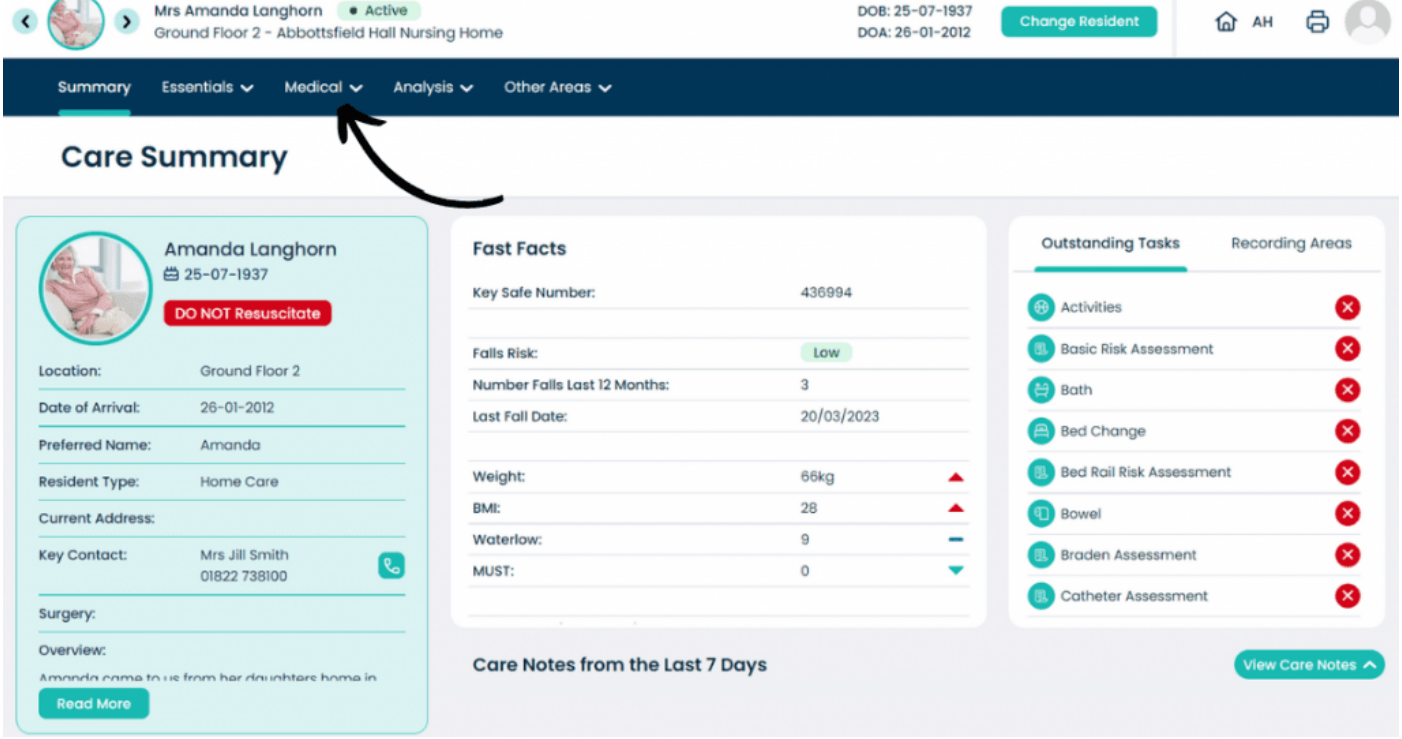
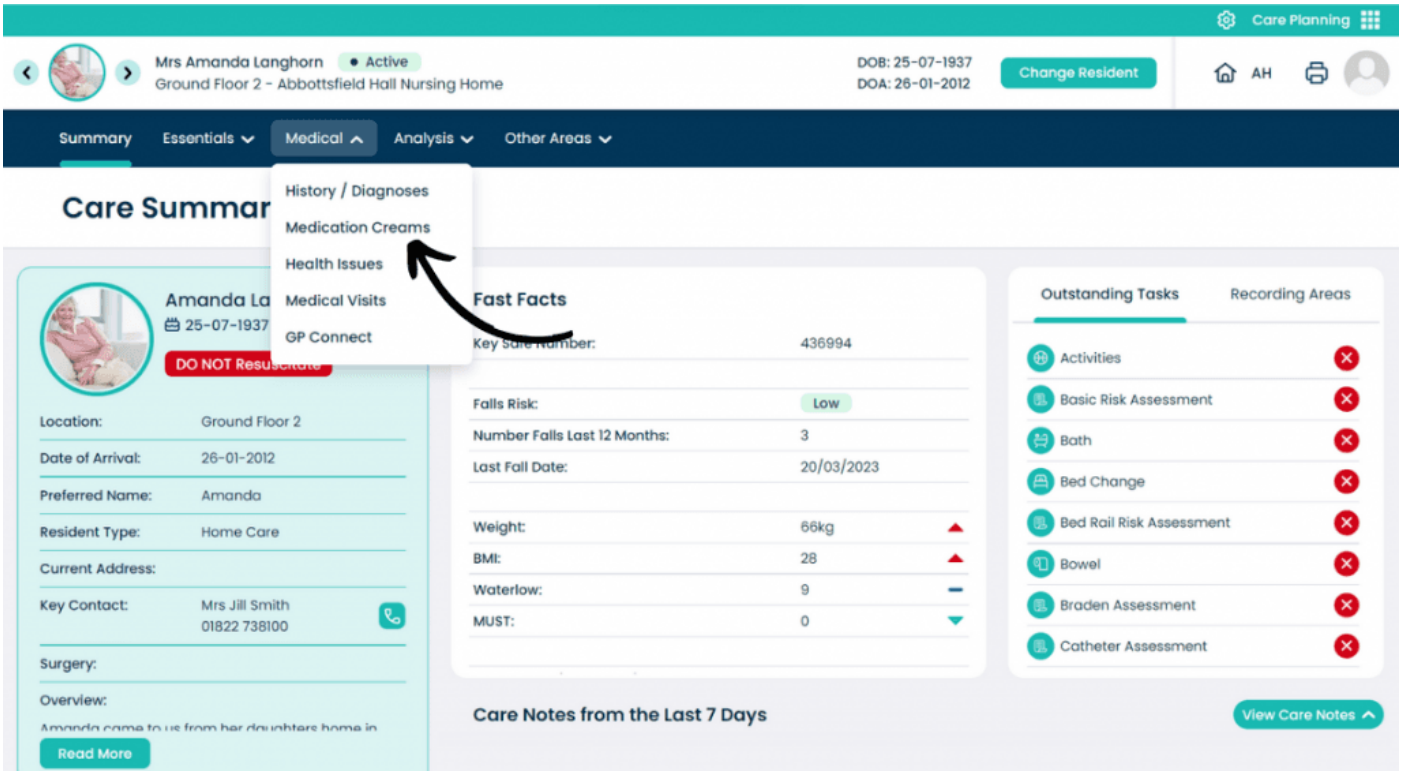
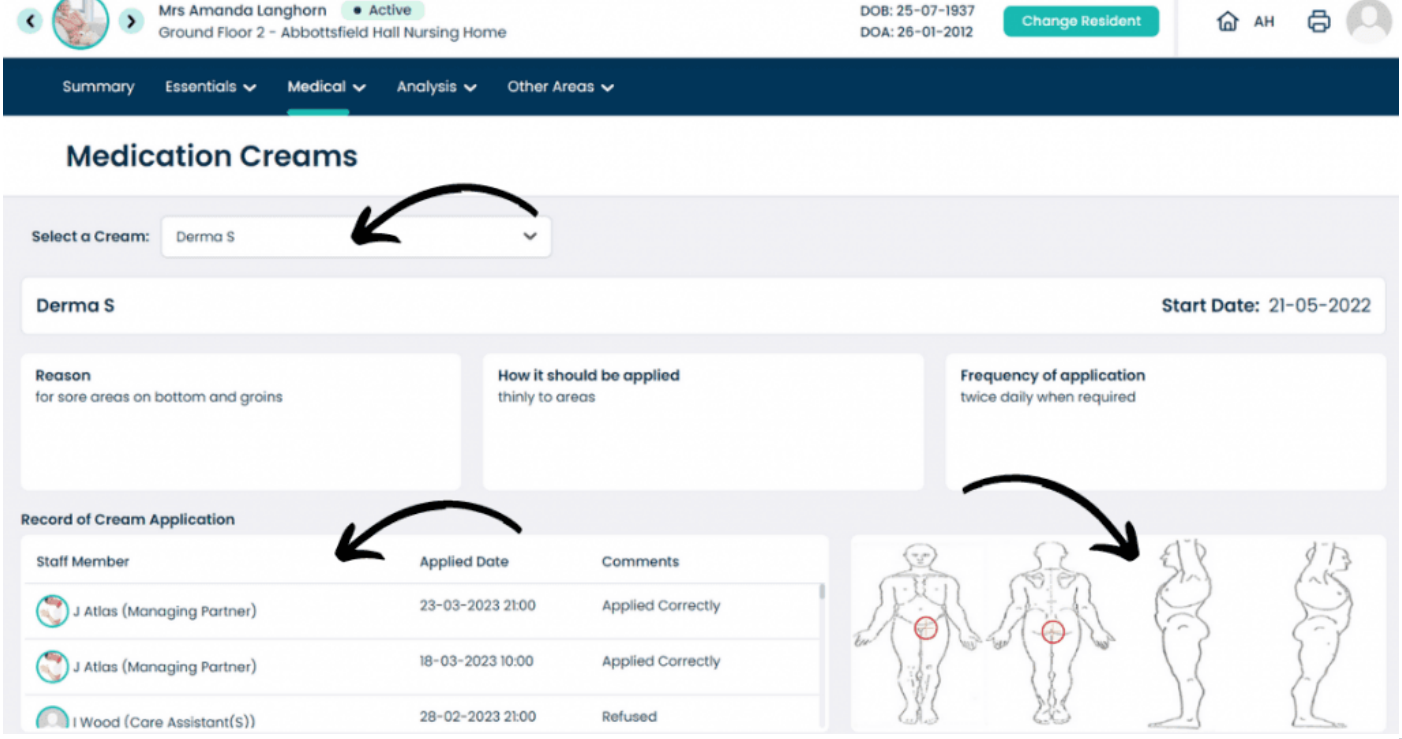
This guide will cover how to view cream medications on a service users Care Plan within Care Control Cloud. This are is populated from the Medication Profile with medication marked as '*Creams*' or '*Topical Medication*'.



1

From the Care Plan Summary page, open the **Medical** menu.





3

Creams which have been assigned to the service user will display in the drop-down list at the top of the page.

The centre of the page shows the **reason**, **application method** and **frequency** for the cream.

The bottom left of the page shows **recent applications**, **who** they were recorded by and any other associated **comments**.

The bottom right of the page shows a **body map** associated with the cream for the service user.
