How to Configure QR Code Requirements for Care Activities

Learn how to configure QR code scanning requirements for different care activities, including bed changes, intensive care, sleep checks, personal care and wellbeing checks.

Takes 2 minutes

For: Admins & Managers

Updated: 18th Nov 2026

Introduction

Care Control Cloud allows administrators to configure when staff are required to scan a QR code when recording care activities.

Within **System Settings**, the **QR Codes & NFC Tags** section provides individual settings for different care activities. These allow you to choose whether QR code scanning is required when recording bed changes, intensive care, sleep checks, personal care and wellbeing checks.

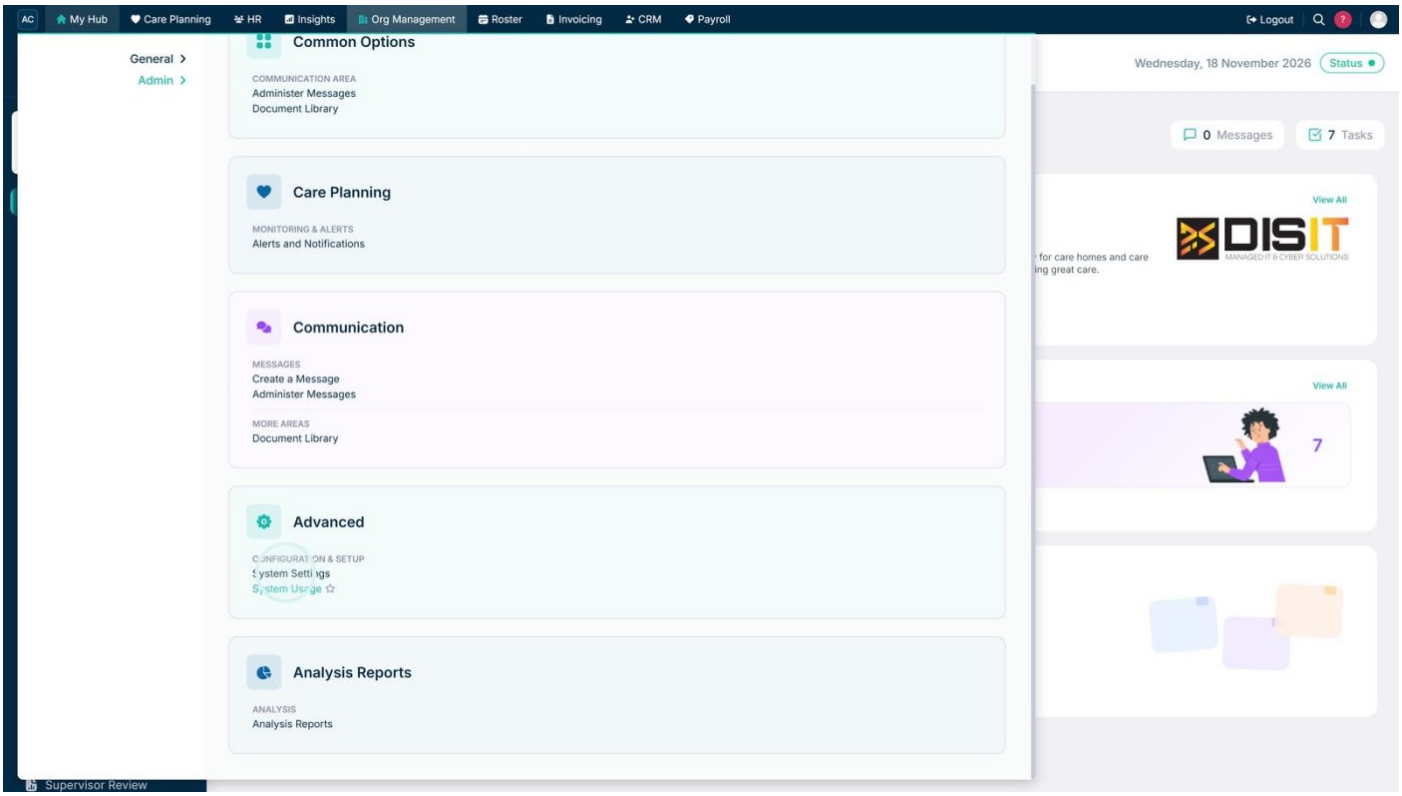

Each setting can be enabled or disabled independently, allowing you to configure QR code requirements according to your service's procedures.

In this guide, you'll learn how to:

- Access System Settings in Care Control Cloud.
- Open the QR Codes & NFC Tags settings.
- Turn on or off QR code requirements for bed changes.
- Turn on or off QR code scanning for intensive care activities.
- Turn on or off QR code requirements for sleep checks.
- Turn on or off QR code scanning for personal care activities.
- Turn on or off QR code requirements for wellbeing checks.

Open System Settings

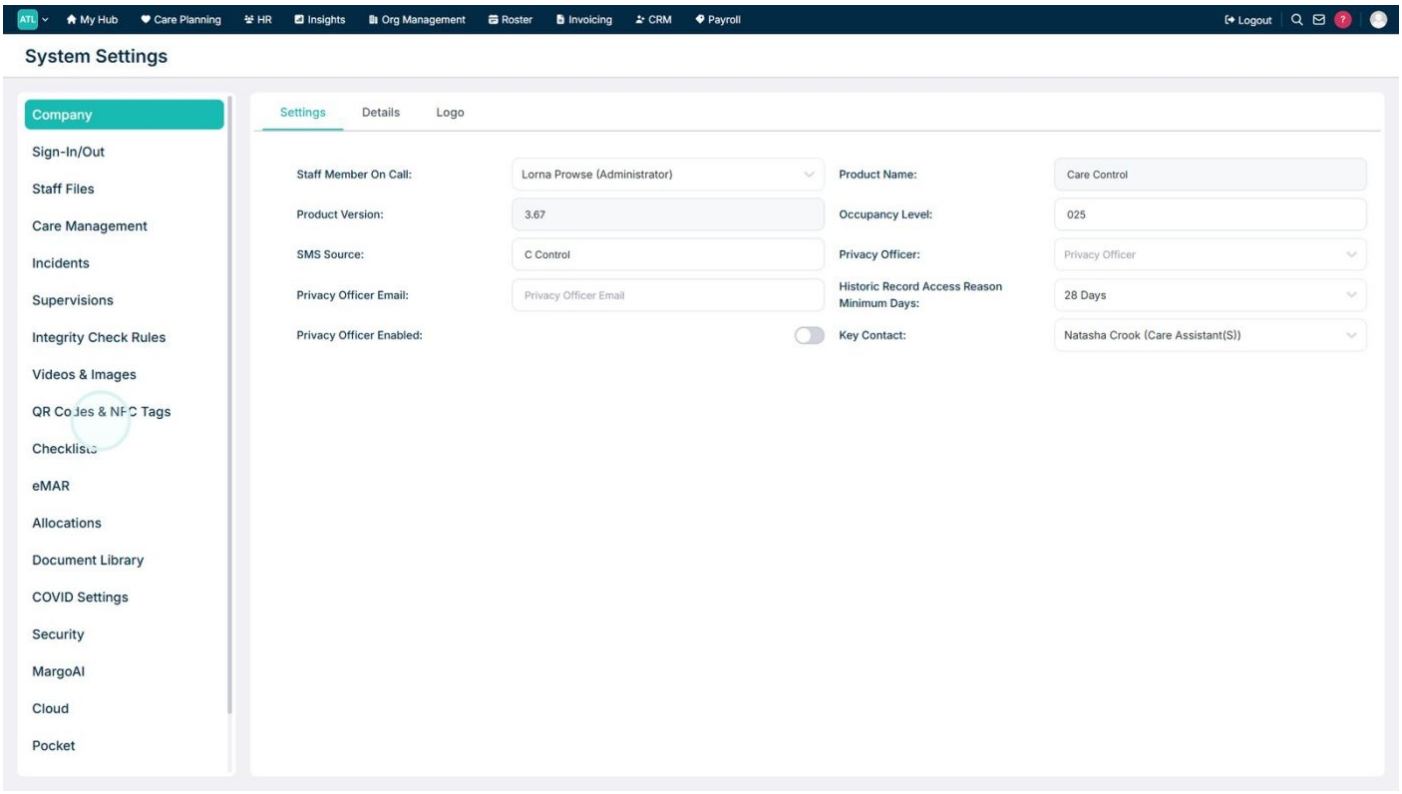

In **Care Control Cloud**, navigate to **System Settings** to access the configuration options for your service.

Open QR Codes & NFC Tags

Within System Settings, select **QR Codes & NFC Tags**.

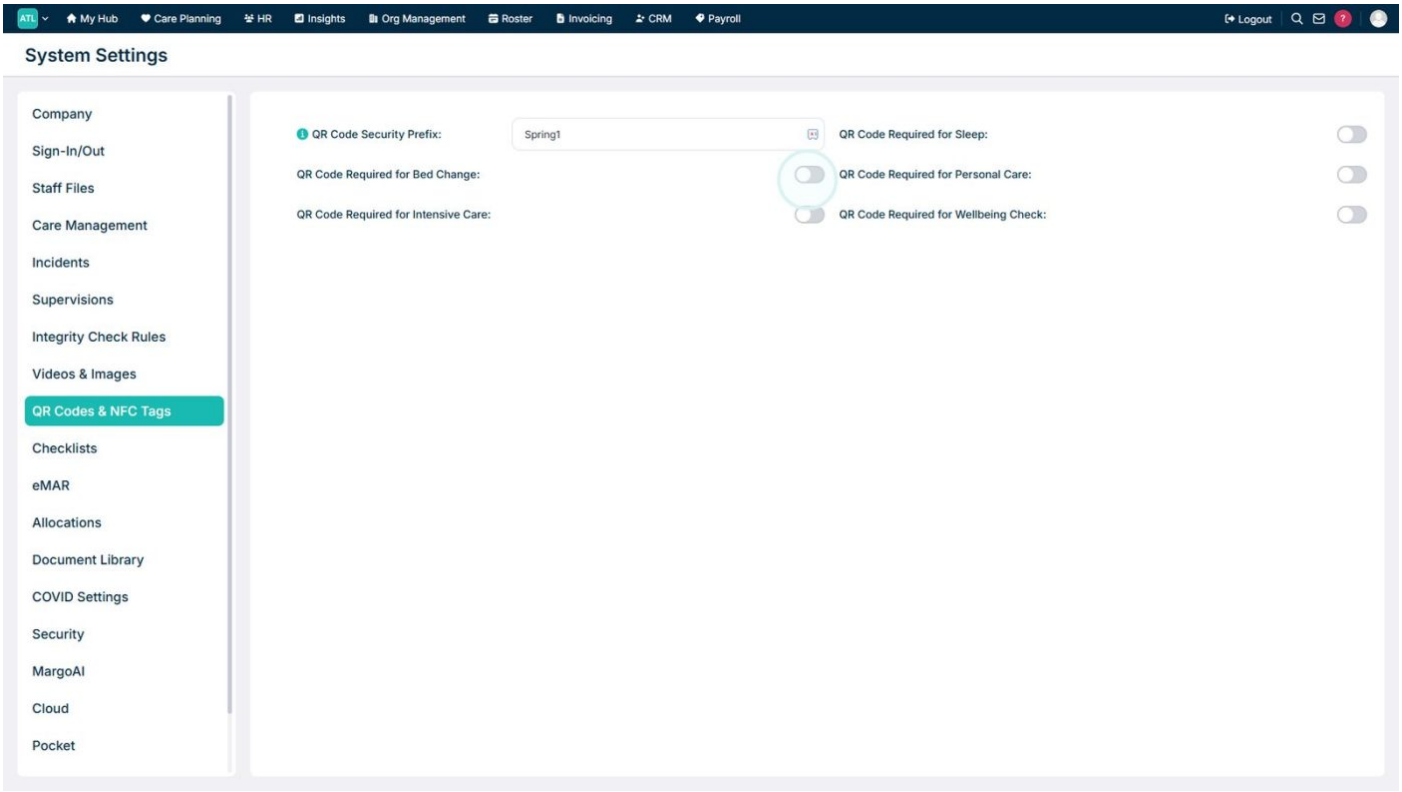

This section contains the settings used to configure QR code scanning requirements for different care activities.

Configure QR Codes for Bed Changes

Locate the setting for **Bed Changes** and use the toggle to enable or disable mandatory QR code scanning.

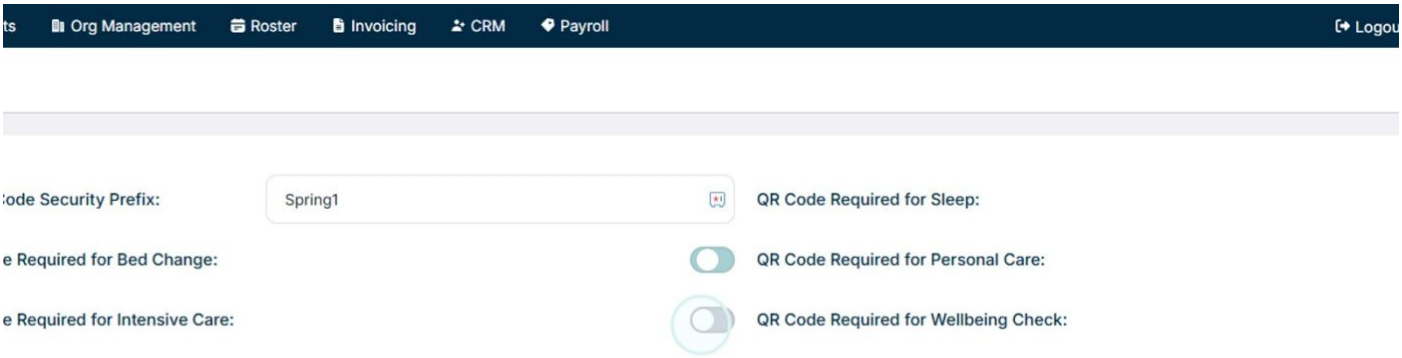

When enabled, staff will be required to scan a QR code when recording bed changes.

Configure QR Codes for Intensive Care

Find the **Intensive Care** setting and use the toggle to configure whether QR code scanning is required.

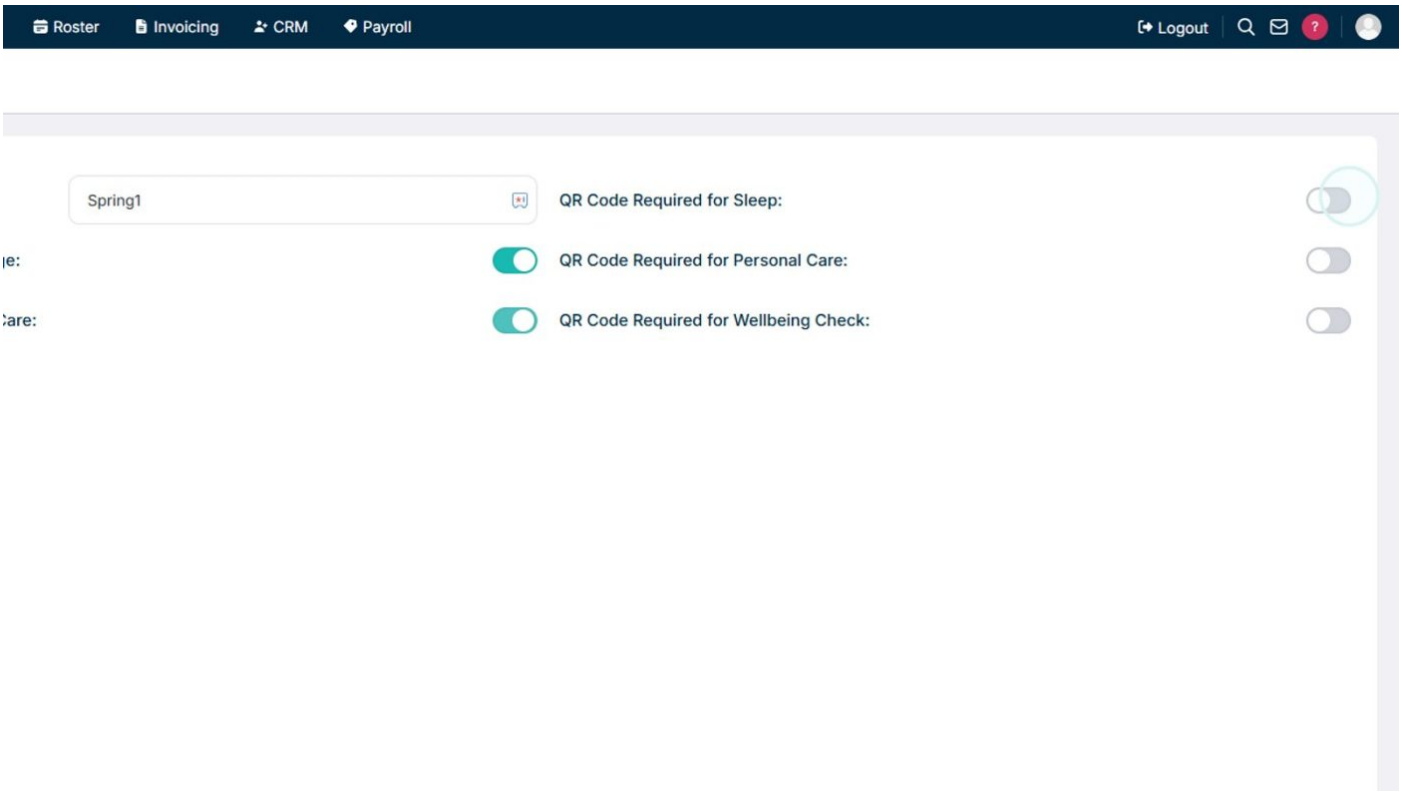

Enabling this setting makes QR code scanning mandatory when recording intensive care activities.

Configure QR Codes for Sleep Checks

Locate the **Sleep Checks** setting and use the toggle to enable or disable QR code scanning.

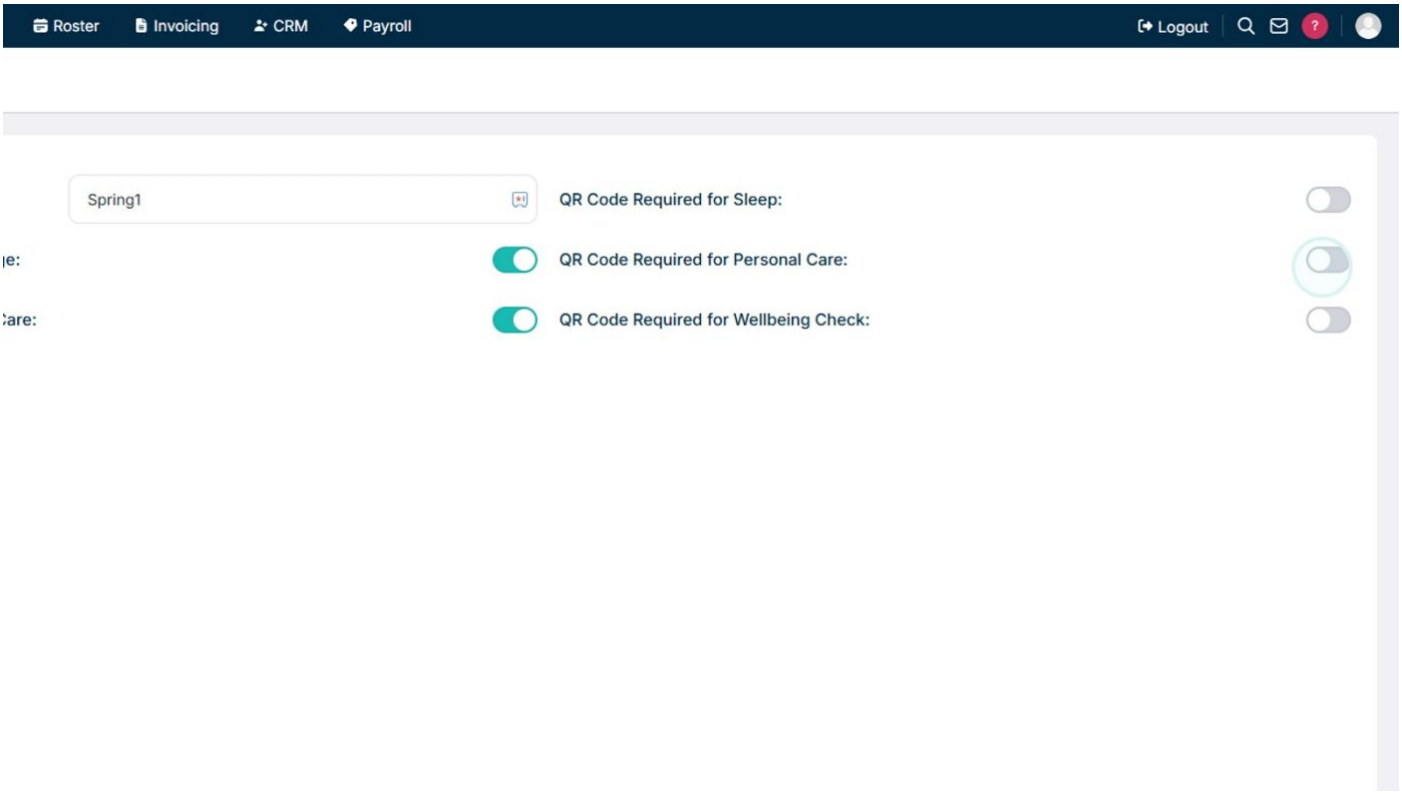

When enabled, staff will need to scan a QR code when recording sleep checks.

Configure QR Codes for Personal Care

Find the **Personal Care** setting and use the toggle to choose whether QR code scanning is required.

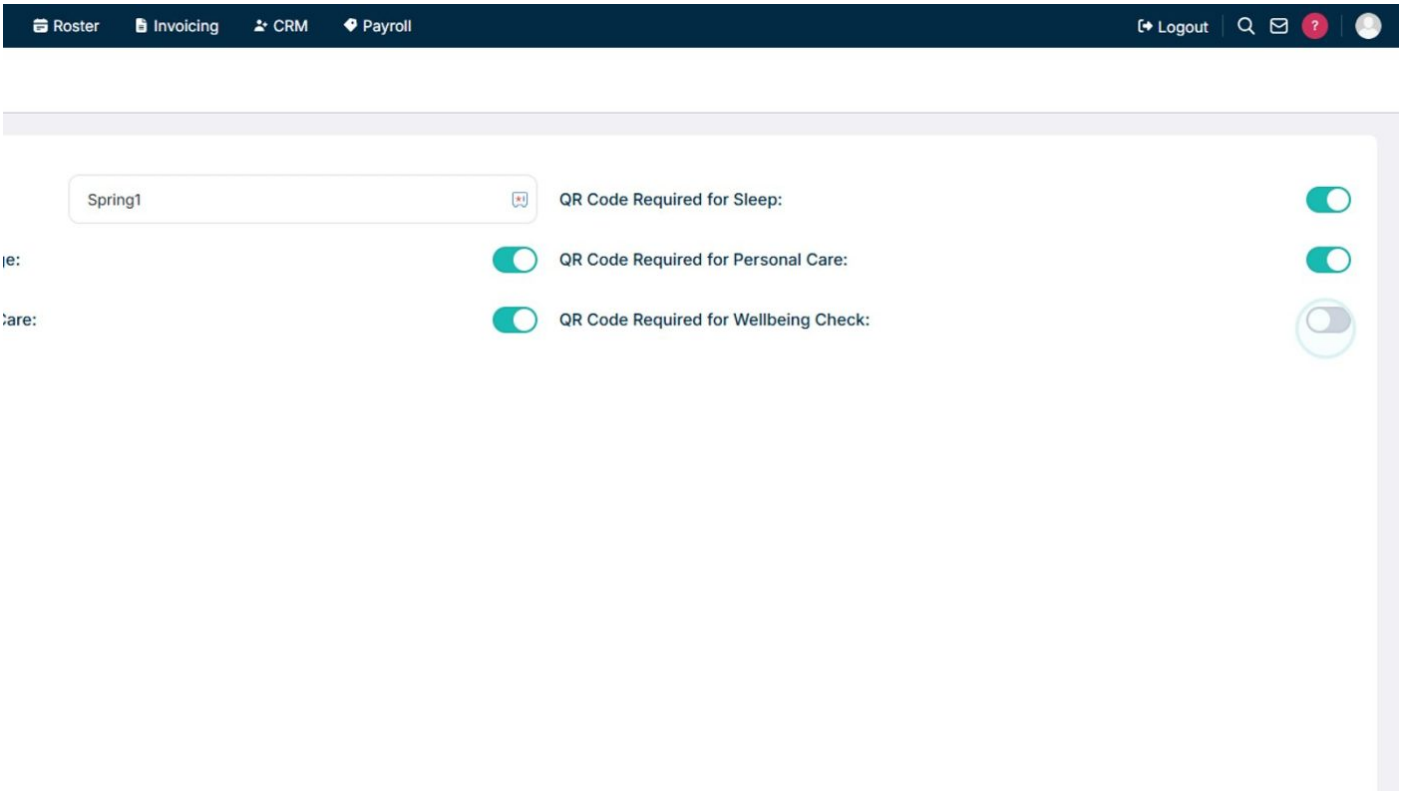

Enabling this option requires staff to scan a QR code when recording personal care activities.

Configure QR Codes for Wellbeing Checks

Locate the **Wellbeing Checks** setting and use the toggle to enable or disable mandatory QR code scanning.

When enabled, staff will be required to scan a QR code when recording wellbeing checks.

Top tip

You can enable QR code requirements individually for each care activity, allowing you to choose which activities require staff to scan a QR code.
