Introduction

The **Pre-Care Review Assessment** area allows you to review the assessment form currently in use and check how different responses affect the care domains that are triggered.

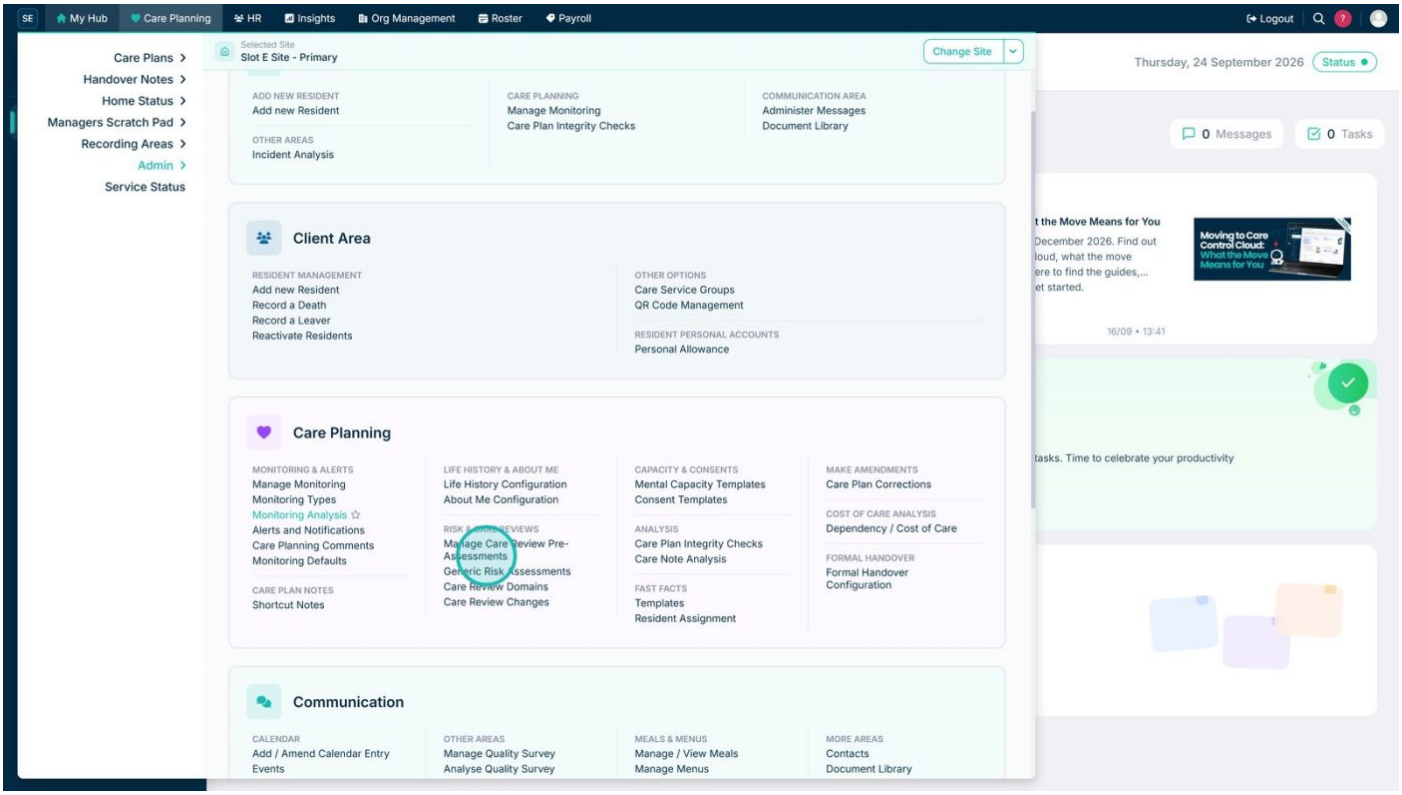

You can preview the current form, select responses to test the assessment, open triggered domains for more information, and review previous versions of the form where required.

In this guide you'll learn how to:

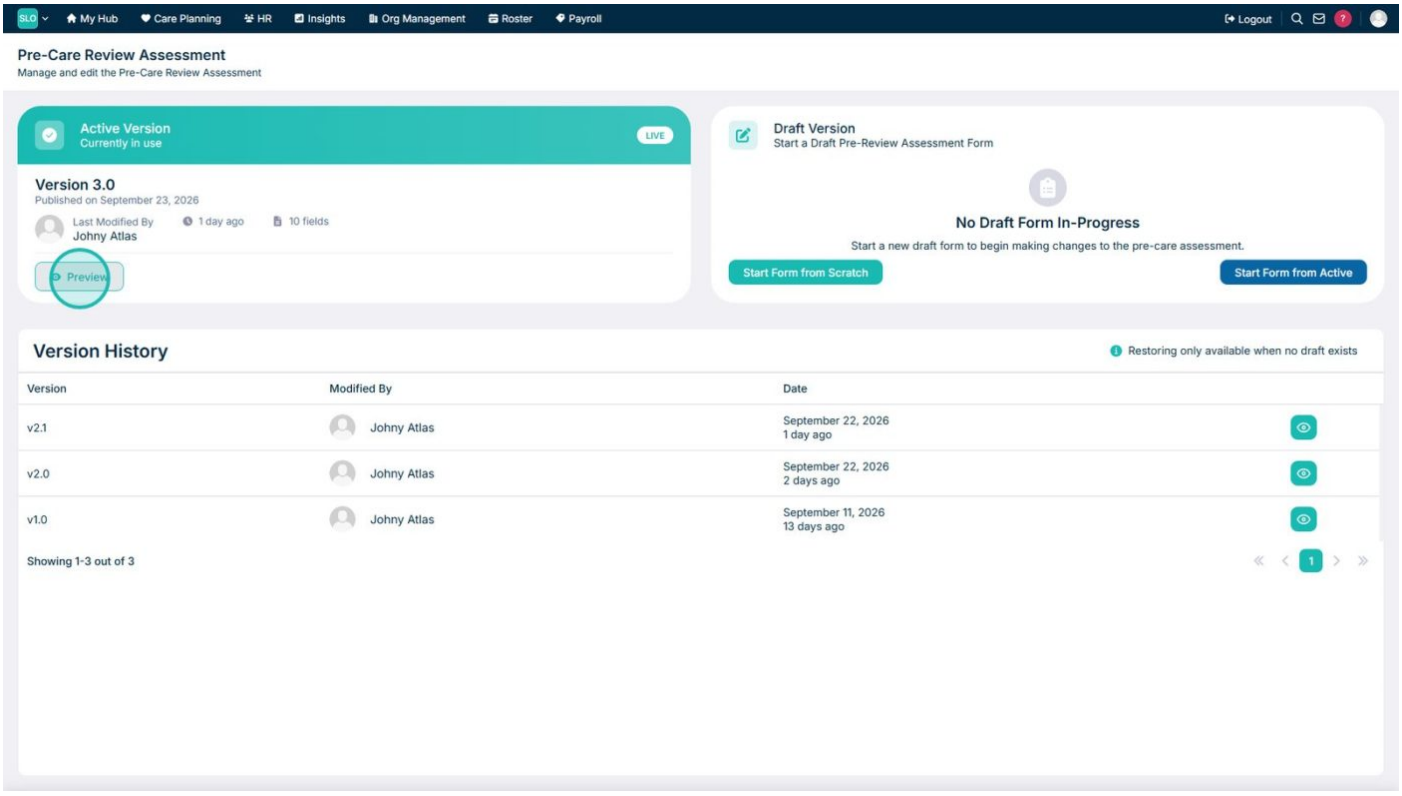

- Open the Pre-Care Review Assessment area
- Preview the current assessment form
- Test responses within the assessment

- Review triggered care domains
- View previous versions of the assessment

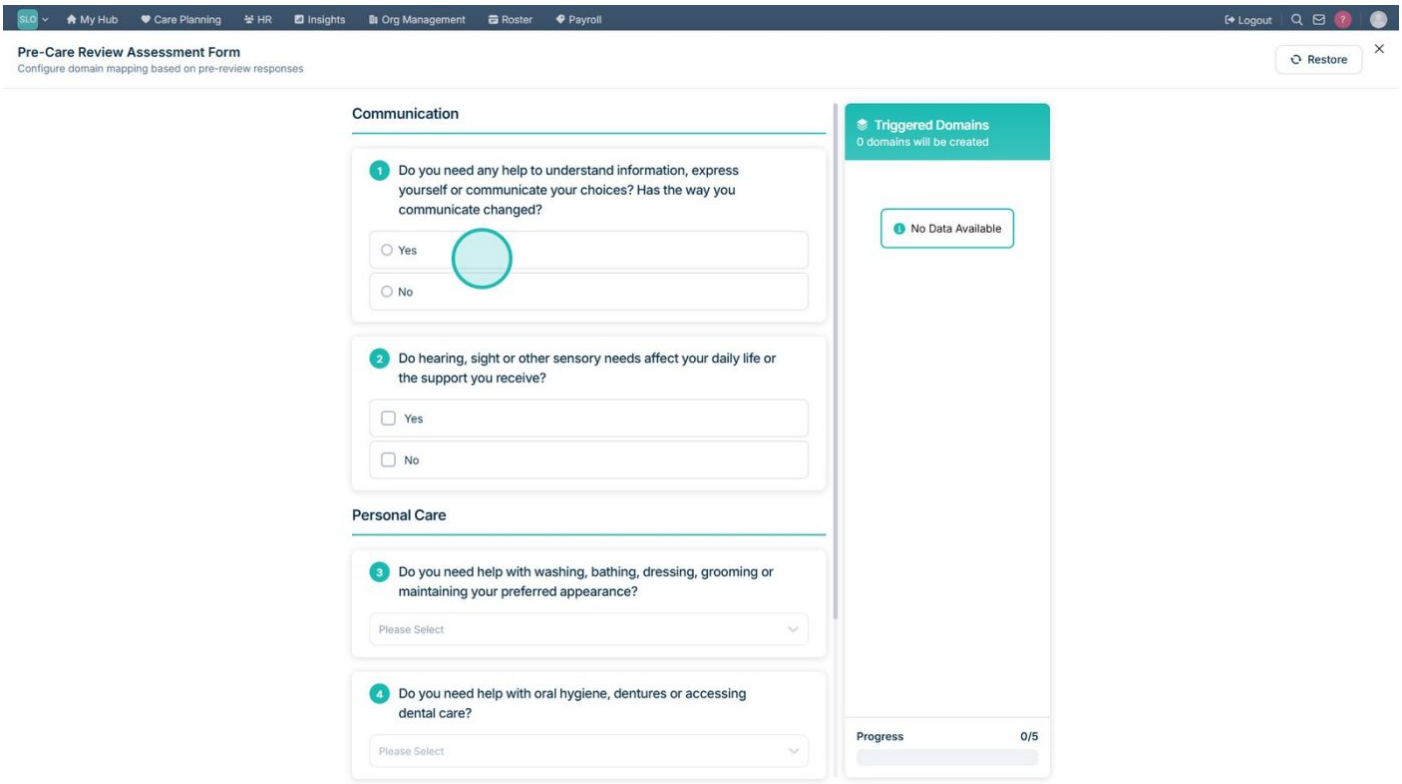

Open the Pre-Care Review Assessment section.

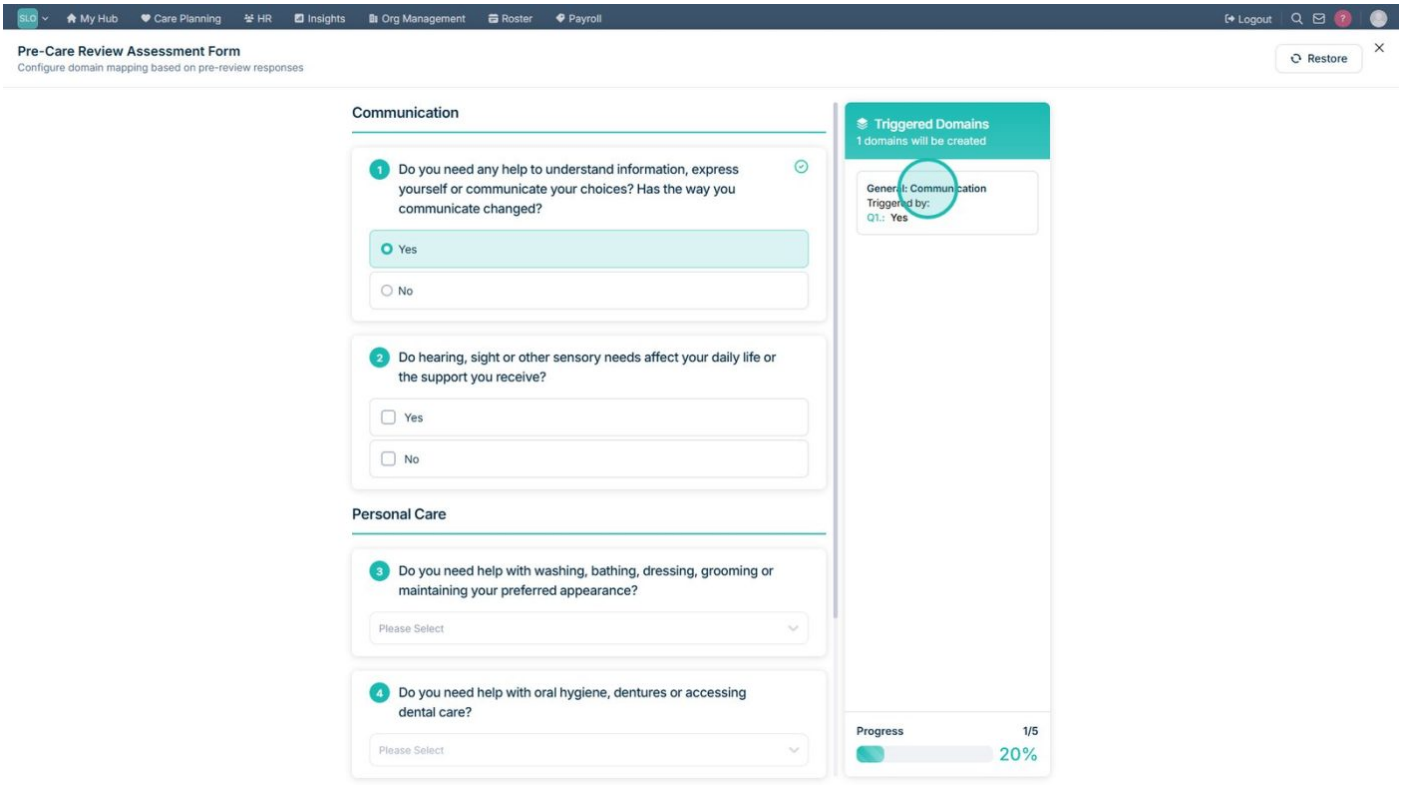

Preview the current assessment form.

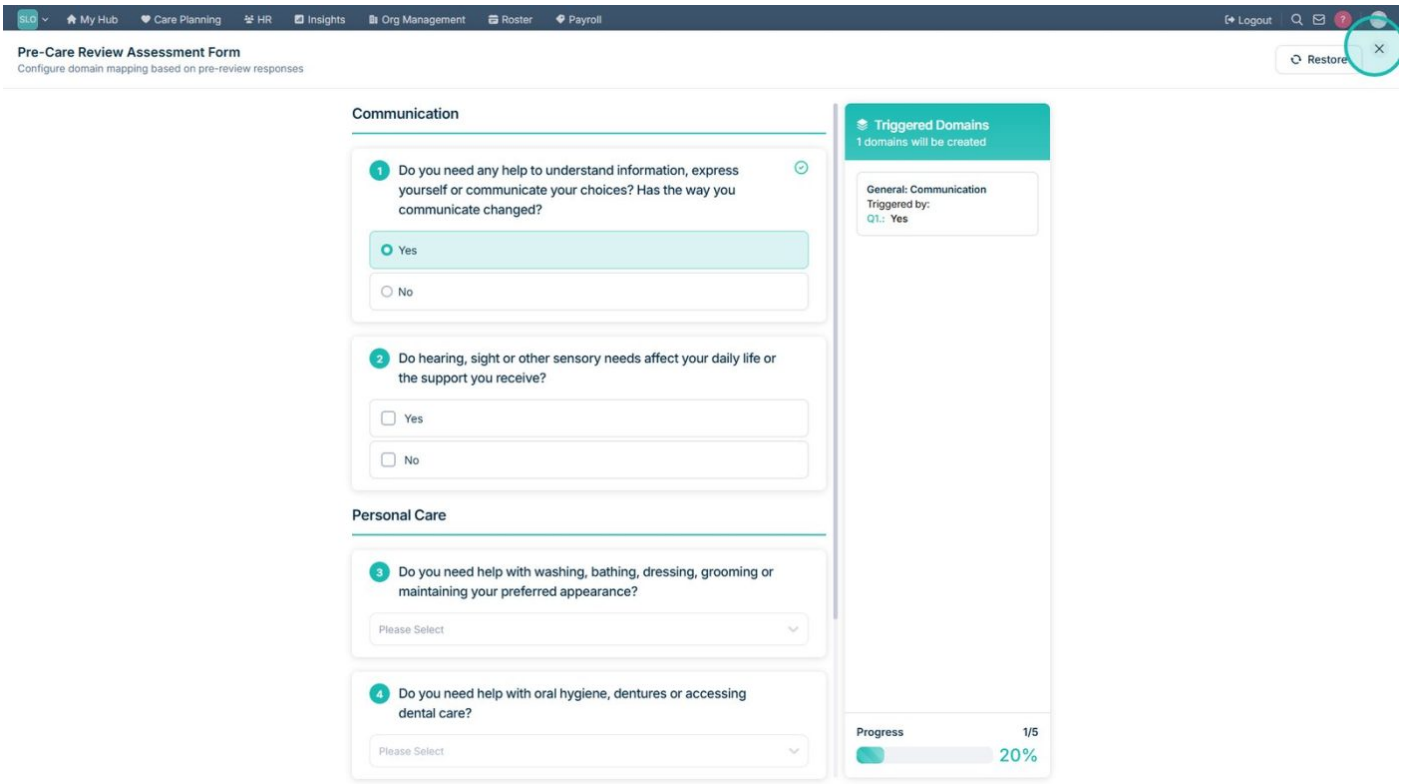

Select a response to test how the assessment behaves.

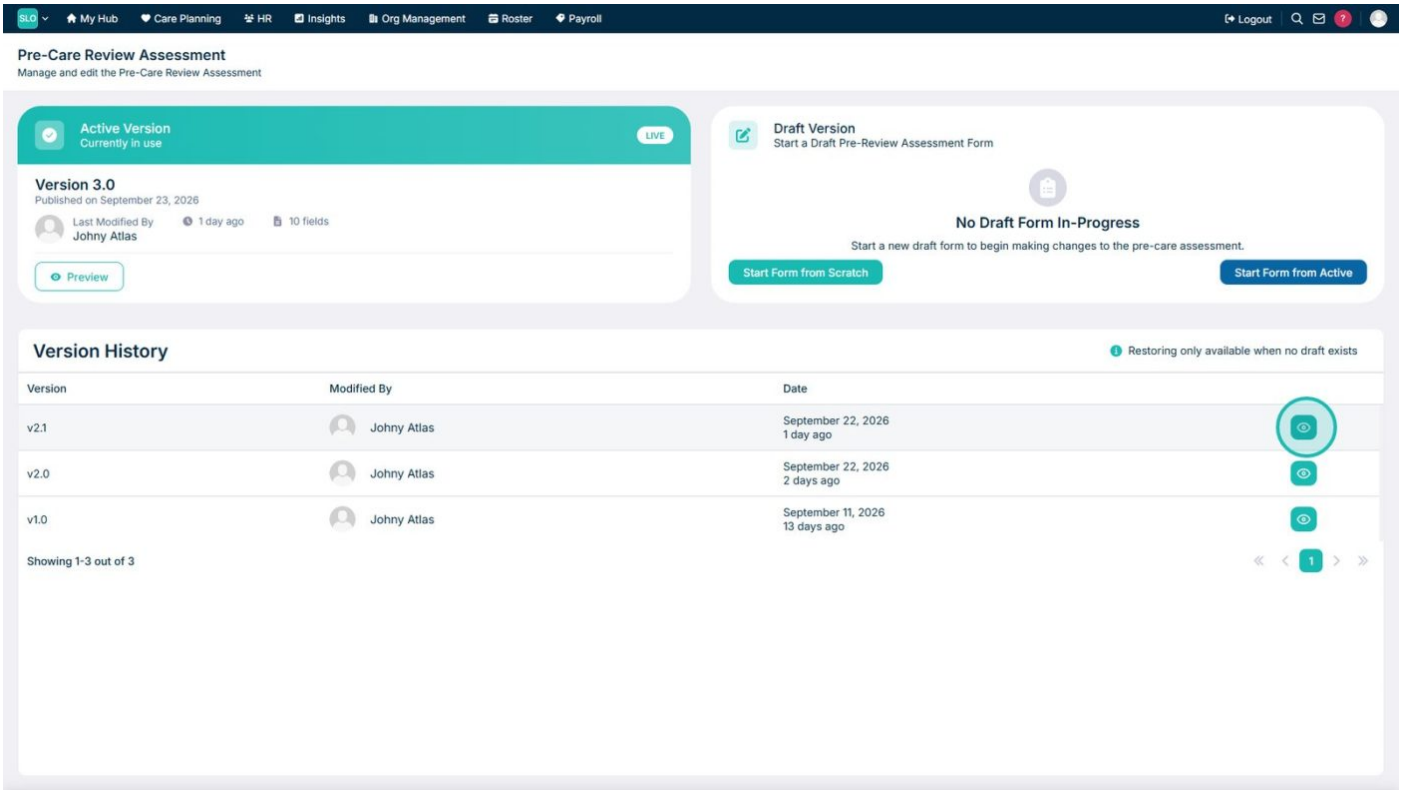

Select a highlighted triggered domain to review the related recommendations.

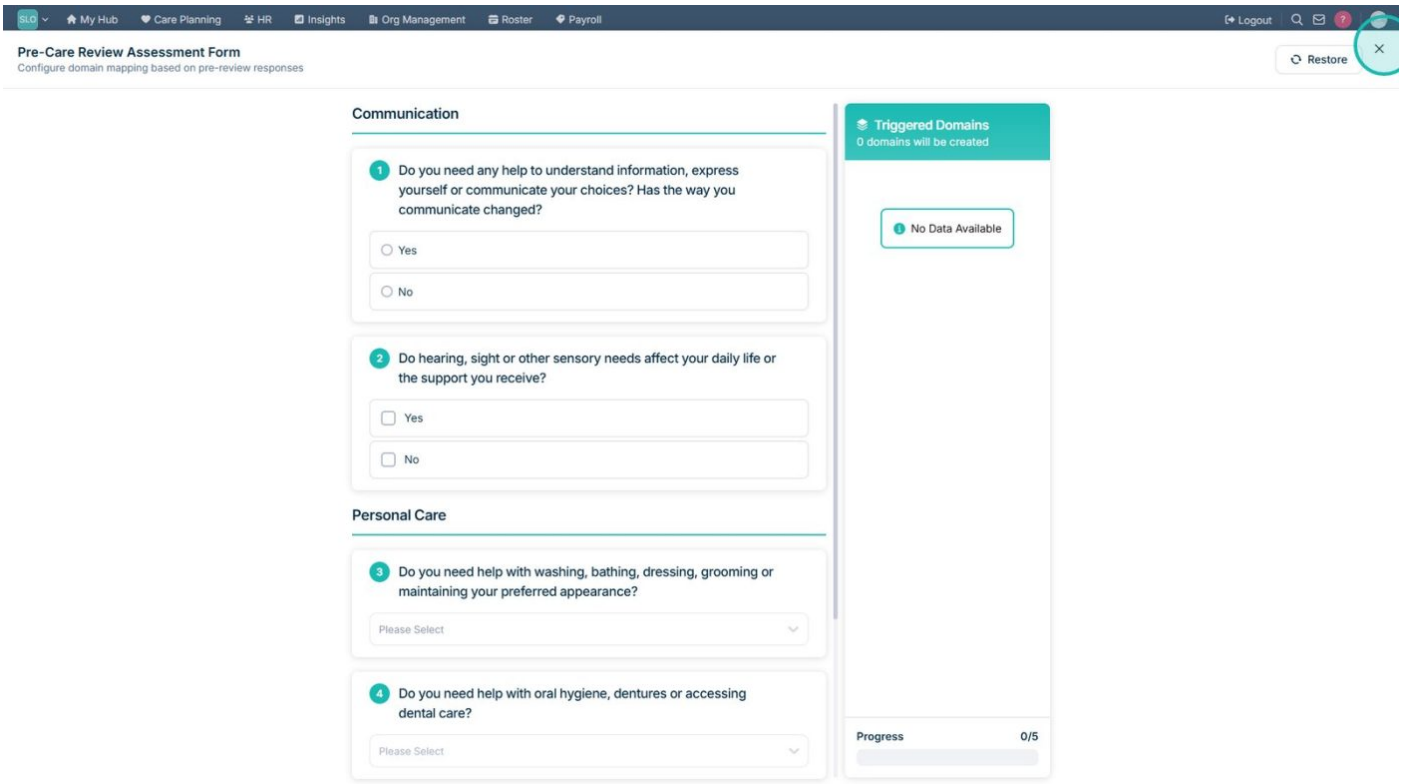

Select Close to exit the assessment preview.

Open a previous version of the assessment form to review earlier changes.

Close the previous assessment version when you have finished reviewing it.

Top tip

Use the preview to test different responses and check that the correct care domains are triggered before the form is used in live Pre-Care Reviews.
