Reactivating a Service User

Care Plans Windows · https://cclearninghub.co.uk/docs/reactivating-a-service-user/

Reactivating a Service User

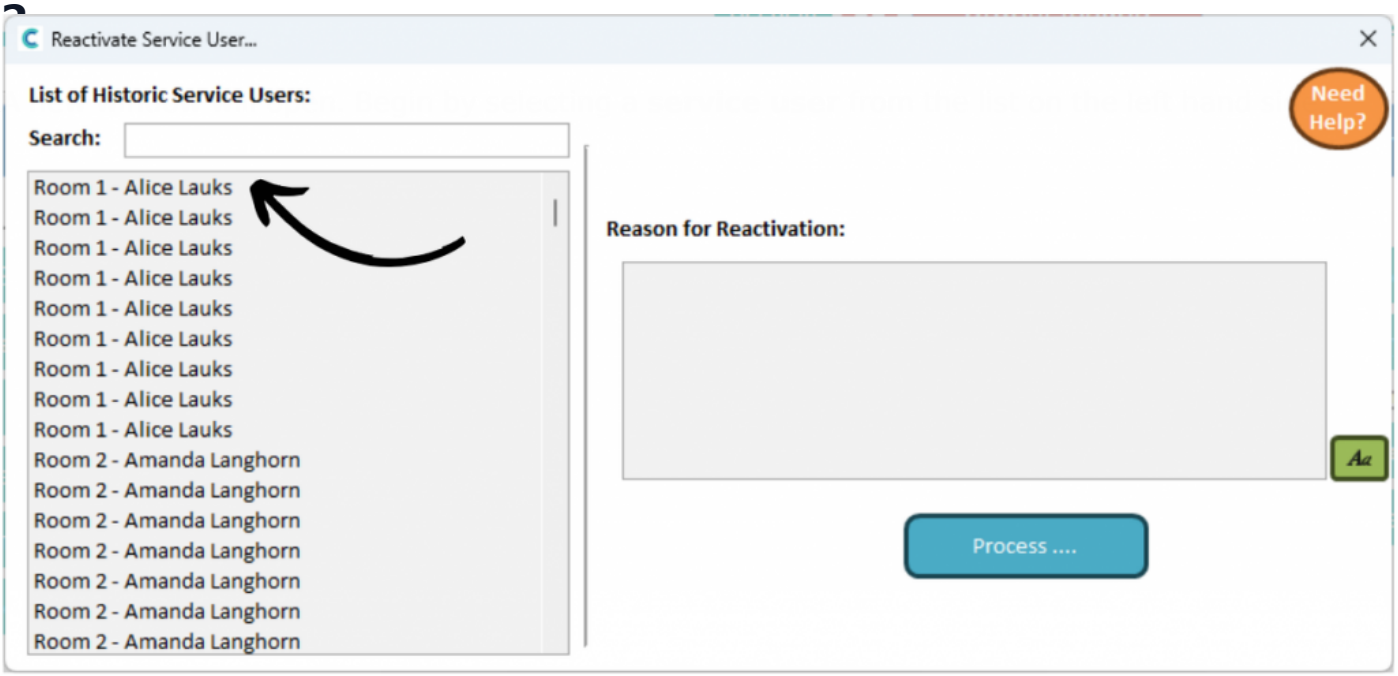

This guide will cover how to reactivate a service user which has previously been removed from your Care Control system. This is completed via Care Control Windows.

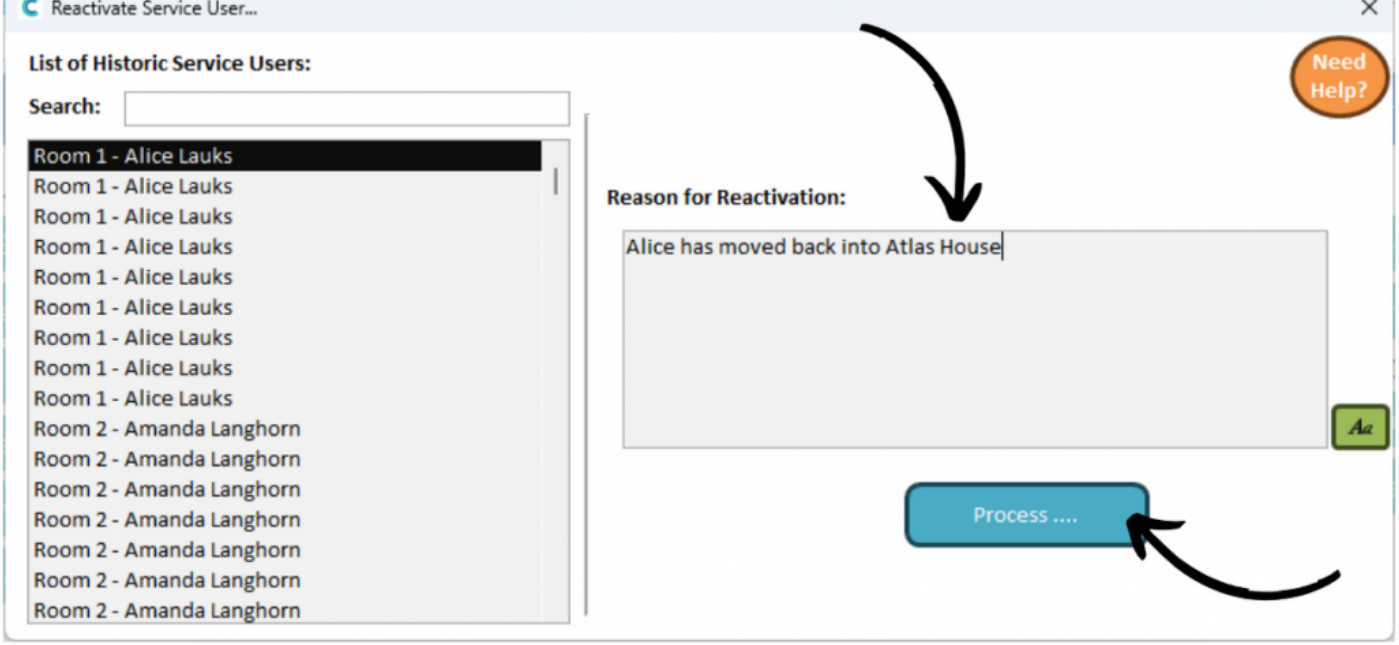

1

In the Administration of Care Control Windows, navigate to the **Reactivate a Client** tool, which can be found under the Client Area tab.

3

Next, enter a reason for reactivation and press **Process**.

4

You will receive a confirmation message to inform you that some monitoring areas will have been restarted.
