You can follow the interactive guide or the following steps:

1. Select **Cloud Registration** when on the Lets get started screen.
2. Tap **Continue**.
3. Enter your site code into the **Your Code** text box, you can receive this from a manager.

4. Enter your **Username** into the next text box, this is usually your email address.
5. Tap **Continue.**
6. Give your device a name, this should be easily identifiable.
7. Tap **Continue.**
8. If you can access multiple sites you will be able to choose which one you like, tap the correct one.
9. When you sign out, you will be able to select a different site.

Use this sign in method to ensure you are logged in to the correct site every time you log in, this saves time when accessing multiple sites.
