Site Selection Tool – eMAR

Care Control eMAR · https://cclearninghub.co.uk/docs/site-selection-tool-emar/

Site Selection Tool - eMAR

This guide will cover how to configure the Site Selection Tool for Care Control eMAR. This feature allows staff members to switch between different sites within the same organisation.

1

When registering Care Control eMAR on a device, enter your **Business Code** – this commonly starts with *BUS*...

We don't recommend sharing your Business Code with staff members as it can be used to access administrative parts of the system. Instead, enter the code yourself when configuring a device.

Press **Continue**.

2

Enter a **Device Name** and press **Continue**.

Site Selection on eMAR can only be configured in **Shared Staff Access** mode, meaning staff will be presented with a site selection screen before signing in.

Register at a Business Level
You are registering this device under a Business Code. Enter a unique device code and select an option below: -
This Device Name:
MedTablet
Shared Staff Access
Staff will see a list of sites within your organisation when the app loads. They can choose one site and then enter their pin.
<< Go Back
Continue ...

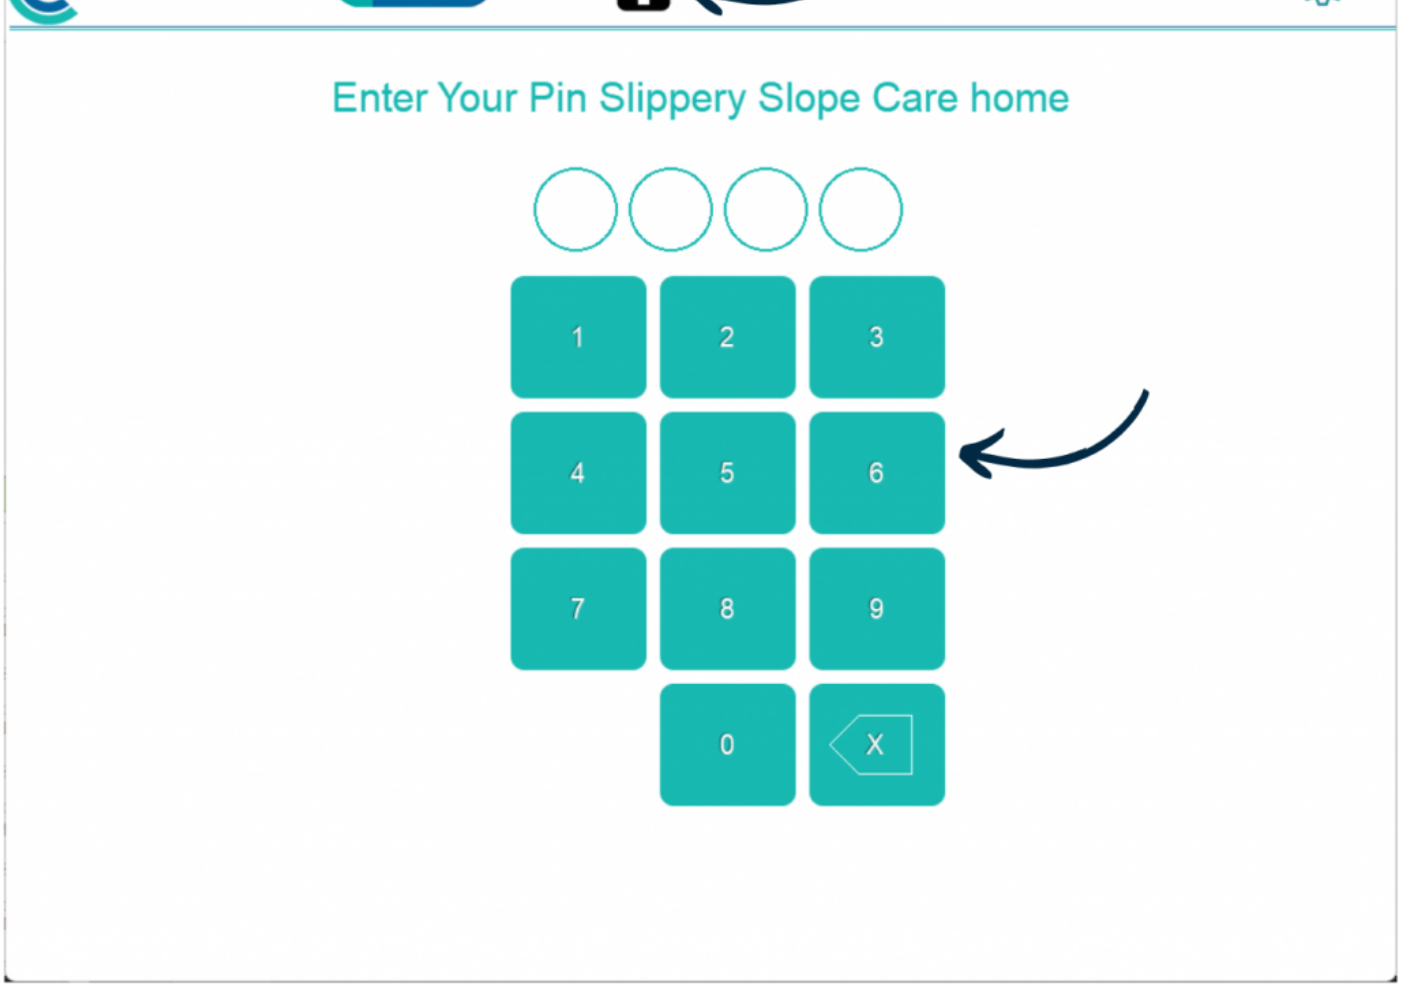

3

Press **Load Site** to access a site within your organisation.

4

Finally, enter your PIN number for the selected site. You can press the **House Icon** to return back to the site selection screen.

Enter Your Pin Slippery Slope Care home
