Turning eMAR On

Care Control eMAR · https://cclearninghub.co.uk/docs/turning-emar-on/

Turning eMAR On

This guide will cover how to enable the Care Control eMAR application for your site. This requires administration access to the System Settings of Care Control Windows.

1

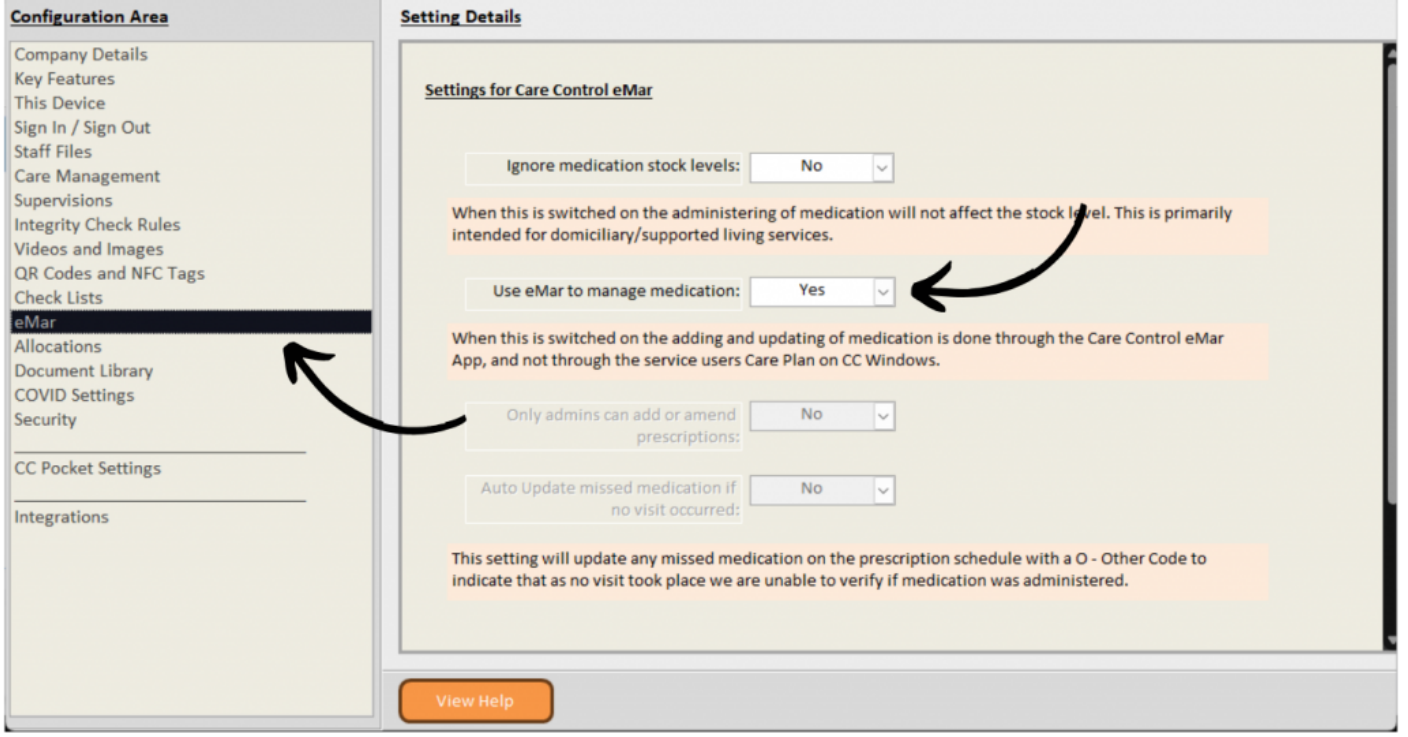

In the Administration of Care Control Windows, navigate to the **System Settings**, which can be found under the Advanced Stuff tab.

2

Here, select **eMAR** from the menu on the left hand side. This will open the relating settings on the right hand side of the window.

To enable eMAR for your site, toggle the **‘Use eMAR to Manage Medication’** option to **Yes**.

Make sure to **Save Changes** after making any amendments.

Setting Details
Settings for Care Control eMar
Ignore medication stock levels:
No
When this is switched on the administering of medication will not affect the stock level. This is primarily intended for domiciliary/supported living services.
Use eMar to manage medication:
Yes
When this is switched on the adding and updating of medication is done through the Care Control eMar App, and not through the service users Care Plan on CC Windows.
Only admins can add or amend prescriptions:
No
Auto Update missed medication if no visit occurred:
No
This setting will update any missed medication on the prescription schedule with a O - Other Code to indicate that as no visit took place we are unable to verify if medication was administered.
