Using QR Codes on Pocket

This guide will cover how to use QR Codes to record information on Care Control Pocket. N.B: This requires QR Codes to be set up first on Care Control Windows or Cloud, please refer to the dedicated guide.

1

After signing into Care Control Pocket, press the **2 arrows** in the bottom left corner of the screen.

2

The recording option menu will open. Here, select a monitoring type that is set up for QR Code recording. In this example we will open **Sleep Information**.

General Note
Record an Incident
Activities
Bath or Shower
Bowel Movements
Creams
Fluid Intake
Food Intake
Medical Visit
Movement Chart
Personal Care
Sleep Information
Wellbeing Check
Your Custom Monitoring
Show All

3

A list of your service users will be displayed. When QR Code recording is set up you will not be able to select the service user just by tapping on their icon, instead you must scan a QR Code. To do so, press **Show QR Code Scanner** at the top of the screen.

4

The camera will open and prompt you to scan the QR Code for the service user. After doing so, the service user will be selected from the list, and you will be able to press **Continue** to proceed with

the monitoring area.
